Senate Resolution No. 118

Relative to thanking the Governor's Lawyers Committee

WHEREAS, One of the most vital problems before the people of the State of California is that of developing and conserving sufficient water to meet the growing demands of the State; and

WHEREAS, In the solution of the water problem not only technical questions of an engineering nature are involved, but equally important is the legal aspect of the situation. To solve the problem from a legal point of view, the Governor was fortunate to secure the services of a group of the State's most astute and most profound students of the law who were sufficiently public spirited to serve on a special committee appointed for the purpose of studying the State's water problems; and

WHEREAS, This committee has labored diligently, devoting its Saturdays and Sundays and working late into the night after many a busy day, without compensation, giving generously of its time and talents to this most worthy cause; now, therefore, be it

Resolved, That the Senate of the State of California deems it right and proper that the members of this committee should be given due recognition for the unselfish service they have rendered and that the Senate desires by this resolution to thank the following members of the Governor's Committee of Lawyers: Charles C. 2. The committee shall consider but is not limited to the operation, effect, administration, enforcement and needed revision of any and all laws in any way bearing upon or related to the subject of this resolution and shall report thereon to the Senate, including in the reports its recommendations for appropriate legislation.

RESOLUTIONS

The following resolution was offered:

By Senator Farr:

Senate Resolution No. 120

Relative to requesting the Regents of the University of California to study the feasibility of establishing a campus of the university on the Monterey Peninsula

WHEREAS, It has become apparent from enrollment projections prepared by the State Department of Finance and from estimates made by other agencies, including the Joint Staff for the Liaison Committee of the State Board of Education and the Regents of the University of California (the report of which was recently submitted to the Legislature), that unprecedented increases in enrollment should be expected shortly by the University of California; and

WHEREAS, The establishment of new university campuses appears to be the most equitable method of meeting the evident need for additional university facilities, by locating such facilities nearer to new major sources of students; and

WHEREAS, There are adequate and convenient sites on the Monterey Peninsula that are available for a campus that would serve the South Central California Coast Section and are sufficiently distant from the university campus in Berkeley to serve an area where its services would not be immediately conflicting with those of the Berkeley campus; and

WHEREAS, The cultural environment on the Monterey Peninsula is particularly conducive to institutions of higher learning as evidenced by the location at Monterey of the United States Naval Post Graduate School of Engineering, the United States Army Language School, and the residence on said peninsula of many retired educational leaders from throughout the United States and Europe; now, therefore, be it

Resolved by the Senate of the State of California, That the Regents of the University of California are requested to have suitable studies made of the feasibility and appropriateness of establishing a new campus of the university on the Monterey Peninsula, including estimates of the cost involved and recommendations to the

Legislature thereon, such recommendations to be presented at the convening of the next regular session of the Legislature in 1958; and be it further

Resolved, That a copy of this resolution be transmitted to the Regents of the University of California.

Resolution read, and referred to Committee on Rules.

Make us willing and strong enough to place ourselves always on the side of true knowledge which leads to light, wisdom and peace. Look favorably then upon our prayers this day so that we may please Thee both in our words and actions and accomplish what is best for our people. AMEN.

DEAR MR. BEEK: Transmitted herewith for your information is a statement unanimously adopted by the State Water Board at its meeting held May 3, 1957.

STATEMENT OF THE STATE WATER BOARD IN REGARD TO
PRESENT PROBLEMS RELATING TO WATER

To the Members of the California State Legislature

GENTLEMEN: Up until this time the State Water Board has refrained from making any recommendations with regard to a constitutional amendment designed to alleviate the problem of water distribution in the areas of surplus and in the areas of deficiency. However, because there are a number of such proposed constitutional amendments, all aimed at the same objectives, it is believed that a recommendation from this board may be of assistance to the Legislature.

The State Water Resources Board was created in 1945. Last year it became the State Water Board. By legislative direction the original State Water Plan of 1931 has been brought up to date. This new plan, called The California Water Plan, will be before the Legislature in the next 30 days in the final form and outlines the physical works to conserve and develop the State's water resources for present needs, and plan as far as humanly possible into the future. The board has been assured by the engineers of the Department of Water Resources that this plan is a blueprint for development of our water resources sufficient to take care of the water needs of all areas of the State.

Some \$18,000,000 of state funds have been appropriated over the past 10 years to develop this plan. In the meantime the State of California has had an unparalleled growth in its agricultural, industrial, and urban areas. The Legislature is well aware of the many problems which this growth has caused. We have spent billions on highways, schools, and other state facilities, but the development of our water resource facilities has in nowise kept apace with increasing demands.

In The California Water Plan we now have the outline for solving our water problems. There remains, however, a major roadblock.

Primarily this roadblock is the lack of a clear, concise, and equitable legislative policy setting forth the water rights of the areas of surplus, and provisions by which areas of deficiency may obtain firm contract rights to the water which will be exported to them under The California Water Plan.

There are before the Legislature a number of proposed constitutional amendments, each of which has merit. In addition, the Lawyers' Committee, appointed by Governor Knight, has just submitted a new draft of a proposed constitutional amendment which substantially covers all of the points at issue. These proposals all have a common purpose. Our board believes that a solution of this problem is possible and is absolutely essential at this session of the Legislature if we are to move out of the present water stalemate.

Much of the problem, so far as the areas of origin are concerned, can be resolved within the framework of the state filing procedure, now set forth in the Water Code, provided it is given a firm constitutional basis; and provided further, that the reservations which are to be made for the areas of origin are to be good as against all parties, not alone against the assignees of state filings.

We want to again emphasize that the construction of water control and development projects are the only final answer. A continuing program of headwater storage construction in the Sacramento Valley and of storage development in the north coastal area for local use and import to the Sacramento Valley is the only means by which there can be assurance of a continuing supply available for export from the delta to the San Francisco Bay area, to the central coastal area, to the San Joaquin Valley, and to Southern California.

Such a program, too, is the only means, in our opinion, by which the exporters can acquire the rights they must have without ultimately impairing the water supply for the Sacramento Valley. Already objections have been raised by Sacramento Valley and delta interests to further diversions of unregulated flow from the delta by the U. S. Bureau of Reclamation.

It is significant that the East Bay Municipal Utility District has been stopped, at least temporarily, in its plans for further development of the Mokelumne River by court action brought by the Counties of Amador and Calaveras—the areas of origin. It can be anticipated that there will be other actions like this until areas of origin can be assured of adequate reservations and that when projects for their needs are necessary they can be built.

We cannot emphasize too strongly that unless a solution to this basic problem is formulated and adopted by the Legislature at *this session*, and a continuing progressive program of water development adopted and implemented, we have reached the point of stagnation of water development in California by *any* agency, federal, state, or local.

We therefore recommend:

(a) That the Legislature agree upon a constitutional amendment to be submitted to the voters, and upon statutes where necessary, that will remove the indefiniteness and uncertainties in the present water law and assure fairness to both areas of origin and areas of deficiency.

(b) That the Legislature take steps to create a Water Development Fund along the lines recommended by the Governor and his committee of lawyers.

(c) That the Legislature make a policy declaration that the State has a continuing responsibility, to be exercised in cooperation with other water developing agencies, to assure that the water needs of all

areas of the State will be met when and where they occur and as projects to satisfy them are found feasible.

STATE OF CALIFORNIA, GOVERNOR'S OFFICE
SACRAMENTO, April 1, 1957

*To the Honorable Members of the Senate
Sacramento, California*

GENTLEMEN:

Senate Bill No. 1774, "An act to add Sections 5.1, 5.2, 5.3, 5.4, 5.5, 5.6, 13.5, 15, and 16 to, and to amend Sections 5 and 12 of, Chapter 124 of the Statutes of 1955, relating to the holding of winter Olympic games in California, providing for the disposition of facilities after completion of said games, making an appropriation therefor and authorizing eminent domain, declaring the urgency thereof, to take effect immediately,"

in my opinion constitutes an emergency bill within the meaning of that term as used in Section 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

This bill appropriates \$2,990,000 from the State Park Fund to the California Olympic Commission in augmentation of Item 413 of the Budget Act of 1956 for the construction of facilities in Squaw Valley, California, for the holding of the 1960 Winter Olympic Games. These facilities are also to be permanent in nature with the intention that the site will become a part of the State Park System after the games. In order to stage these games in 1960, it is required that the facilities be tested under actual competitive conditions during the winter before the holding of the games. Because of the extremely short period each summer during which construction work can be performed in this area, it is necessary that the actual construction of these facilities be commenced by June 20, 1957, and the construction

contracts must be awarded in advance of that date. For these reasons, the funds provided by this bill should be made immediately available.

I therefore recommend consideration of Senate Bill No. 1774 as an emergency measure.

Respectfully submitted,

GOODWIN J. KNIGHT, Governor

Senate Resolution No. 120

Relative to requesting the Regents of the University of California to study the feasibility of establishing a campus of the university on the Monterey Peninsula.

WHEREAS, It has become apparent from enrollment projections prepared by the State Department of Finance and from estimates made by other agencies, including the Joint Staff for the Liaison Committee of the State Board of Education and the Regents of the University of California (the report of which was recently submitted to the Legislature), that unprecedented increases in enrollment should be expected shortly by the University of California; and

WHEREAS, The establishment of new university campuses appears to be the most equitable method of meeting the evident need for additional university facilities, by locating such facilities nearer to new major sources of students; and

WHEREAS, There are adequate and convenient sites on the Monterey Peninsula that are available for a campus that would serve the South Central California Coast Section and are sufficiently distant from the university campus in Berkeley to serve an area where its services would not be immediately conflicting with those of the Berkeley campus; and

WHEREAS, The cultural environment on the Monterey Peninsula is particularly conducive to institutions of higher learning as evidenced by the location at Monterey of the United States Naval Post Graduate School of Engineering, the United States Army Language School, and the residence on said peninsula of many refined educational leaders from throughout the United States and Europe; now, therefore, be it

Resolved by the Senate of the State of California, That the Regents of the University of California are requested to have suitable studies made of the feasibility and appropriateness of establishing a new campus of the university on the Monterey Peninsula, including estimates of the cost involved and recommendations to the

Legislature thereon, such recommendations to be presented at the convening of the next regular session of the Legislature in 1958; and be it further

Recommendation of the Governor

In accordance with Article IV, Section 34, of the Constitution, the Governor presented the following communication recommending the consideration of Assembly Bill No. 616.

STATE OF CALIFORNIA, GOVERNOR'S OFFICE

SACRAMENTO, April 1, 1957

*To the Honorable Members of the Senate
Sacramento, California*

GENTLEMEN:

Assembly Bill No. 616, "An act to repeal and re-enact the Fish and Game Code, and include therein codification of Chapter 1447, Statutes of 1947, and

to repeal Chapter 1447 of the Statutes of 1947, relating to fish and game, and making an appropriation,"

in my opinion constitutes an emergency bill within the meaning of that term as used in Section 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

This bill was submitted by the California Law Revision Commission as a revision of the Fish and Game Code pursuant to Chapter 204 of Resolutions, Statutes of 1955. It further appears that among the provisions of this revision there is an appropriation, but that no additional funds are made available for expenditure. In these circumstances, prompt consideration of this bill is desirable and no purpose would be served by withholding action upon it until after final passage of the Budget Bill.

I therefore recommend consideration of Assembly Bill No. 616 as an emergency measure.

Respectfully submitted,

O God, we, Thy servants, appear this day in Thy sight. Unworthy though we are to stand before Thee, we humbly beg Thy help in the work before us. We declare our dependency upon Thee and acknowledge that Thou art the source of all our blessings. To ears that are open, Thou speakest—to eyes watchful, Thou revealest—to hands ready, Thou givest power. Grant us Lord, the strength to endure adversity in patience, to meet harshness with gentleness, to answer prejudice with tolerance so that men may know that Thy presence dwells within us. May we all experience the joy and gratification that come to men who fulfill the best in their own nature and live by those ideal qualities that give meaning to our human existence. Help us Lord, to prove both in our life and in its dealings with others how good it is for men to dwell together in unity. AMEN.

MESSAGES FROM THE GOVERNOR

STATE OF CALIFORNIA, GOVERNOR'S OFFICE

SACRAMENTO, May 8, 1957

To the Honorable Members of the Senate

State of California

Sacramento, California

GENTLEMEN: I am returning herewith, without my signature, Senate Bill 412, entitled: "An act to amend Section 6334 of the Education Code, relating to school district budgets."

My objections to this bill are as follows:

This bill contains a technical defect in referring to "a newspaper having general circulation within the district published within the county." Under Sections 6020 et seq. of the Government Code there is a procedure for a judicial decree declaring that a newspaper is of general circulation, but there is no procedure for determining that a newspaper has a general circulation within a particular area, such as a school district, which may be embraced within its coverage. In view of this, the author has stated that he has no objection to my veto of this bill. There would also seem to be time to pass another bill eliminating this defect at this session, if desired.

Accordingly, I am returning this bill to the house in which it originated without my signature and with this statement of my objections thereto.

Respectfully submitted,

GOODWIN J. KNIGHT, Governor

Message read, and ordered printed in the Journal.

Senate Bill No. 412 ordered placed on the unfinished business file.

STATE OF CALIFORNIA, GOVERNOR'S OFFICE

SACRAMENTO, May 8, 1957

To the Honorable Members of the Senate

State of California

Sacramento, California

GREETINGS: I am returning herewith, without my signature, Senate Bill 350, entitled: "An act to amend Section 27177 of the Streets and Highways Code, relating to bridge and highway districts."

My objections to this bill are as follows:

This bill would remove the present confidential status of certain accident reports made to the California Highway Patrol, and, as such, presents a serious question as to state policy.

As I have repeatedly said, I believe that all information concerning public business should be available to the public. I feel just as firmly that personal and private information concerning members of the public, which only comes incidentally into the possession of state departments, should not thereby become public. The citizens of our state have a right to be protected with reference to purely private information concerning themselves. They have a right of privacy which should not be needlessly invaded.

It is highly important, for example, that the state have reports of accidents in order to properly plan accident prevention in the fields of enforcement and highway construction. It is, however, unfair that persons who are required to give this information to serve these particular public purposes should thereby have their right of privacy invaded and highly personal information be made the subject of public curiosity or private commercial gain.

If this information is to be made available, it is certain that in a great many cases vital information will not be secured because the citizens are unwilling to submit information to public agencies which will be available to satisfy the curiosity or serve the commercial purposes of other individuals.

This type of private information has no relationship to freedom of the press because the information kept confidential by statute at the present time involves only the personal phases of the information, and that part of the information which is of public interest is available to newspapers and to others. The code of ethics of newspapers would not permit them to publish this highly personal private information.

In this particular instance amendments adopted to the bill in the other house accomplished a purpose which did not have the concurrence of the author, and the author, in recognition of the fact that this bill might invade the privacy of persons involved in accidents, concurs with me in the principles I have set forth and recommends that this bill be vetoed.

Accordingly, I am returning the bill without my signature.

Respectfully submitted,

GOODWIN J. KNIGHT, Governor

Message read, and ordered printed in the Journal.

Whenever a decision of the department suspending a license for 30 days or less becomes final, whether by failure of the licensee to appeal the decision or by exhaustion of all appeals and judicial review, the licensee may, before the operative date of such suspension, petition the department for permission to pay into the Alcohol Beverage Control Fund a sum of money in lieu of serving such suspension. Upon the receipt of such a petition, the department shall cause such investigation to be made as it deems desirable and may grant such petition if it is satisfied (a) that public convenience and necessity would be better served by permitting the licensee to operate during the period set for suspension and that the payment of the sum of money will achieve the desired disciplinary purpose; (b) that the books and records of the licensee are kept in such a manner that the monetary loss which the licensee would have suffered had such suspension gone into effect can be determined with reasonable accuracy; and (c) that the sum of money offered by the licensee is in excess of three times the net profit computed without relationship to taxes which it could be anticipated the licensee would derive from his alcoholic beverage business during the period of suspension.

23096. If the department makes the findings required in Section 23095, it shall communicate such findings to the licensee who shall thereupon pay the sum stipulated to the State Treasury for deposit in the Alcohol Beverage Control Fund. If the suspension was imposed as a result of an accusation filed by another public officer acting in his official capacity, the department shall not order such permanent stay of suspension without the written concurrence of such other public officer.

23098. If the department does not make the findings required in Section 23095, and does not order the suspension permanently stayed, the suspension shall go into effect on the operative date finally set by the department. The department's failure to make such findings or order such stay are not subject to review by the Alcoholic Beverage Control Appeals Board or by any court.

"SECTION 1. Section 7000.7 is added to the Education Code, to read:

7000.7. The Legislature finds that the apportionment of the State School Fund for the Fiscal Year 1956-57 was based on the assessed valuation of property in this State as shown by the equalized assessment roll of the several counties for the Fiscal Year 1955-56; that as a result of orders issued by the State Board of Equalization increasing the assessed valuation of property in several of the counties of this State for the Fiscal Year 1955-56, the school districts in the counties affected have received allowances from the State School Fund during the Fiscal Year 1956-57 in amounts considerable less than they would otherwise have received; that the orders of the State Board of Equalization increasing the assessed valuations of property were based on inadequate and erroneous samplings of local assessment practices in the counties affected by such orders; that the apportionment of the State School Fund for the Fiscal Year 1957-58 and thereafter will likewise result in the school districts of the counties affected by the orders of the State Board of Equalization receiving allowances from the fund in amounts less than they would otherwise receive unless adjustments in the assessed valuation of the property in such districts are not allowed upon request of the affected districts.

SEC. 2. Section 7083 is added to said code, to read:

7083. Upon request of any school district whose assessed valuation was increased during the Fiscal Year 1955-56 as a result of an order of the State Board of Equalization, the Superintendent of Public Instruction shall use in computing the district aid under Section 7081 the total assessed valuation of property in the district as shown by the equalized assessment roll for the preceding fiscal year, reduced in the same proportion as the increase in the total assessed valuation of property in the district as a result of such order of the State Board of Equalization.

SEC. 3. Section 7193 is added to said code, to read:

7193. If during the Fiscal Year 1956-57, or any subsequent fiscal year, there is apportioned to a school district or to any fund from the State School Fund an amount based upon the assessed valuation of the district which was increased during the Fiscal Year 1955-56 as a result of an order of the State Board of Equalization, the governing board of such school district may request the Superintendent of Public Instruction to recompute the apportionment of the fund for such fiscal year or years on the basis of the assessed valuation of the district as shown by the equalized assessment roll for the preceding fiscal year, reduced in the same proportion as the increase in the total assessed valuation of property in the district as a result of such order of the State Board of Equalization. Thereupon the Superintendent of Public Instruction shall compare the allowances made to the district during such fiscal year from the State School Fund and the recomputation of the apportionment of the fund for such year. If the amount allowed to the district was less than the amount recomputed, the Superintendent of Public Instruction shall add to the allowances to the district from the State School Fund for the Fiscal Year 1957-58 the amount of the difference. The amount of such difference shall be apportioned from the State School Fund before any other apportionment from such fund is made and shall be allowed from any portion of such fund except that portion reserved for basic state aid.

SEC. 4. Section 7713.1 is added to said code, to read:

7713.1. Notwithstanding any provision of this chapter to the contrary, upon request of any school district whose assessed valuation was increased during the 1955-56 Fiscal Year as a result of an order of the State Board of Equalization, the assessed valuation of the district for purposes of apportionment of state school building aid funds and the repayment of any apportionment made to an applicant school district, shall be deemed to be the total assessed valuation of the property in the district as shown by the equalized assessment roll for current fiscal year, reduced in the same proportion as the increase in the total assessed valuation of property in the district as a result of such order of the State Board of Equalization."

"7732.5. If, on or before August 1, 1957, with respect to the 1957-58 Fiscal Year, and on or before June 30th of any subsequent fiscal year, any school district files a request with the State Controller for a deferment of the annual repayment due from such district during the next succeeding fiscal year for an apportionment received by the district pursuant to this chapter or Chapter 1.6 of this division, and it is determined, in accordance with this section, that the district is entitled to a deferment of all or part of such annual repayment, the deferment shall be made in accordance with such determination.

The portion of the annual repayment to be deferred under this section shall be determined as follows:

There shall be computed the amount required to be raised by taxes on property within the district, during the fiscal year in which the annual repayment is to be deducted pursuant to Sections 5058 and 7731, for the payment of principal and interest on any bonded indebtedness incurred for school purposes prior to any conditional apportionment under this chapter or which was incurred as a condition to any apportionment under this chapter. There shall also be computed the amount required to be raised by taxes on property in the district, during such fiscal year, for the annual repayment of school building apportionments under Chapter 1.6 of this division and under this chapter. The amounts so computed, when added together, shall constitute the "basic tax amount."

There shall be computed the amount which would be produced by a tax of forty-five cents (\$0.45) on each one hundred dollars (\$100) of assessed valuation of the district during such year, to be known as the "forty-five cent tax amount." The amount to be deducted, under Section 5058 or under Section 7731, as the case may be, from State School Fund apportionments to the district, for the annual repayment of the district during the fiscal year in which the annual repayment is due shall be limited to the amount, if any, by which the forty-five cent tax amount exceeds the basic tax amount. Any balance of the annual repayment of the district shall be the deferred repayment which shall be added to the annual repayment the next succeeding fiscal year.

On or before the last day of July of each fiscal year, the State Controller shall request the Director of Finance to, and the Director of Finance shall, determine and certify to the State Controller the amount required to be raised during that fiscal year by taxes on property within each district which has filed a request for deferment pursuant to this section for the payment of principal and interest on any bonded indebtedness incurred for school purposes prior to any conditional apportionment under this chapter and which was incurred as a condition to an apportionment under this chapter. On or before the third Monday in August of each fiscal year, the State Controller shall request the county auditor of each county to, and the county auditor of each county shall, determine and certify to the State Controller the current assessed valuation of property within each district which has filed a request for a deferment under this section.

Before the date on which the board of supervisors makes the levy of taxes for county purposes, the State Controller shall make the deferment determination required by this section for each district requesting a deferment, and, for each district which is entitled to a deferment, shall notify, in writing, the board of supervisors of the county, the governing board of the district, the county auditor, and the county superintendent of schools having jurisdiction over the district of the amount of the repayment of the district which is to be deferred under this section.

For the purposes of this section the "annual repayment of a district" means the amount of the annual repayment of the district due in a fiscal year as determined pursuant to Section 5057 or Section 7729, as the case may be, plus the then unpaid deferred amount of any annual repayment due in any previous fiscal year.

Notwithstanding any other provision of this chapter, if, at the end of the 30-year period provided in Section 5059 or Section 7732, as the case may be, there are any deferred amounts due in any previous fiscal year remaining unpaid, repayments shall continue to be made in the manner provided by this section during each fiscal year thereafter until the amounts are paid, or for an additional period of 10 years, whichever first occurs. At the expiration of the additional 10-year period the unpaid portion of the deferred amounts shall be canceled on the books of the State Controller, and the provisions of Section 5059 or Section 7732, as the case may be, shall thereupon become applicable thereto and the board shall execute a conveyance to the district as provided in Section 5060 or Section 7733, whichever is applicable.

SEC. 2. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Con-

stitution and shall go into immediate effect. The facts constituting such necessity are:

Pyramiding of local property taxes in school districts which have received loans from the State for state school building aid has created serious problems in financing the current operations of schools and threatens the success of bond issues to construction of necessary school facilities. In order to alleviate the situation so that adequate educational opportunity of all of the children of the State will be provided, it is necessary that this act take effect immediately."

On page 2, after line 42, insert

"SEC. 4. This act is an urgency measure necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

The present provisions of the Legislators' Retirement Law, particularly with respect to optional settlements and changes of election with respect to such optional settlements, are so fixed and limited in character as to give rise to dangers of serious hardships in cases of death and other changes in family circumstances. This has resulted in a reluctance on the part of qualified citizens who would otherwise be candidates for the office of Member of the Legislature to seek such office. Because vacancies which have and may occur during the present session of the Legislature should be promptly filled by special elections at the earliest possible time, and because the amendments to the Legislators' Retirement Law contained in this act make changes in provisions dealing with optional settlements and related matters of character which will encourage qualified citizens to seek legislative office, this measure is necessary for the immediate preservation of the public peace, health, or safety."

Recommendation of the Governor

In accordance with Article IV, Section 34, of the Constitution, the Governor presented the following communication recommending the consideration of Senate Bill No. 493.

STATE OF CALIFORNIA, GOVERNOR'S OFFICE

SACRAMENTO, April 29, 1957

*To the Honorable Members of the Senate
Sacramento, California*

GENTLEMEN:

Senate Bill No. 493, "An act making an appropriation in augmentation of the appropriation in Item 146 of the Budget Act of 1956 for support of Department of Justice in connection with legal services rendered the Colorado River Board of California, to take effect immediately,"

in my opinion constitutes an emergency bill within the meaning of that term as used in Section 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

This bill appropriates \$252,223 from the General Fund in augmentation of Item 146 of the Budget Act of 1956 to the Department of Justice for litigation and legal services rendered the Colorado River Board of California. The taking of evidence before the master appointed by the United States Supreme Court in the litigation involving the waters of the Colorado River has continued longer and proved more costly than anticipated when the 1956-57 Budget was prepared, and the additional funds provided in this bill are needed immediately to carry on this litigation.

I therefore recommend consideration of Senate Bill No. 493 as an emergency measure.

Respectfully submitted,

GOODWIN J. KNIGHT, Governor

O, God, we call upon Thee this day. Make haste to help us. Incline not our hearts to evil, but set a guard over our mouths and keep watch at the door of our lips. Deepen, O Lord, our insight into Thy sovereign will—with an understanding that knows Thee, the Creator of all things—a diligence that seeks Thy will—a wisdom that finds Thy pleasure—a way of life that is acceptable to Thee—and a perseverance that fulfills Thy commandments in all that we do for our State and citizens. Lift us, O Lord, above cowardice, timidity, mistrust. May we never permit our conscience to be dulled or our affections chilled, but keep us alert to the instant claim of Thy will, never faltering before the test of the day. Help each of us as individuals to do all within our power to labor and sacrifice until we have accomplished our work and our task is done and the day is over. AMEN.

STATE OF CALIFORNIA, GOVERNOR'S OFFICE
SACRAMENTO, May 9, 1957

*To the Honorable Members of the Senate
State of California
Sacramento, California*

Greetings: I am returning herewith, without my signature, Senate Bill 653, entitled: "An act to amend Section 211 of the Financial Code, relating to the Superintendent of Banks."

My objections to this bill are as follows:

This bill would require that appointments to the Office of Superintendent of Banks be made with the advice and consent of the Senate.

This provision violates a basic rule of public administration that the authority and the responsibility for any act be vested in the same person. When an appointment is made by the Governor of a director of a department to serve at his pleasure, the Governor should be solely responsible to the people for that appointment.

I have been concerned at the trend in recent years to place more and more restrictions upon the Executive in the exercise of his constitutional functions, and I am firmly of the opinion that this trend should not be further extended.

Accordingly, I am returning the bill without my signature.

Respectfully submitted,

GOODWIN J. KNIGHT, Governor

Message read, and ordered printed in the Journal.

Senate Bill No. 653 ordered to unfinished business file.

In accordance with Article IV, Section 34, of the Constitution, the Governor presented the following communication recommending the consideration of Senate Bill No. 245:

STATE OF CALIFORNIA, GOVERNOR'S OFFICE
SACRAMENTO, April 15, 1957

*To the Honorable Members of the Senate
Sacramento, California*

GENTLEMEN:

Senate Bill No. 245, "An act making an appropriation for community mental health services,"

in my opinion constitutes an emergency bill within the meaning of that term as used in Section 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

This bill appropriates \$850,000 from the General Fund for state assistance to the locally administered community mental health services provided in Senate Bill No. 244. In view of the objectives of these bills, and in order to permit of their consideration together, action upon this Senate Bill No. 245 should not be delayed until after final passage of the Budget Bill.

I therefore recommend consideration of Senate Bill No. 245 as an emergency measure.

Respectfully submitted,

GOODWIN J. KNIGHT, Governor

"SECTION 1. The Legislature recognizes that the proper care, protection, and general well-being of the aged is a matter of public interest and concern, and that there is a necessity to enact laws for the protection of aged and ill citizens who require institutional care. It is the purpose of this act to assist aged persons to find a suitable place in which to live, to aid social agencies, hospitals, doctors, and others in helping aged persons to plan for their care, and to assist operators of homes and institutions for the aged to provide adequate care for such persons.

Under pre-existing law the State Department of Social Welfare was required to license and regulate homes and institutions for well aged persons, while hospitals, nursing homes, and sanatoria for ill or convalescent persons were licensed and regulated by the State Department of Public Health. Since the health of aged persons is relative and subject to change, there resulted many similarities between homes and institutions licensed by the two departments, and, as a consequence, a duplication of activities to the confusion of the public.

To eliminate the situation described in the preceding paragraph, and to encourage more active and coordinated programs of social and physical rehabilitation in licensed institutions by placing such institutions in a better position to provide continuity of care, security, and health supervision in pleasant homelike surroundings, the Legislature by this act transfers the licensing and regulatory functions of the State Department of Social Welfare with respect to institutions accommodating the aged to the State Department of Public Health.

It is not the purpose of this act to establish standards which cannot be met by homes and institutions formerly licensed and regulated by the State Department of Social Welfare, or licensed and regulated by the State Department of Public Health, but rather to develop new standards which will not jeopardize the continued operation of such homes.

SEC. 2. Section 1400 of the Health and Safety Code is amended to read:

1400. No person, political subdivision of the State, or other governmental agency within the State, shall establish, conduct or maintain in this State any hospital or nursing and rest home without first obtaining a license therefor as provided in this chapter.

SEC. 3. Section 1401 of said code is amended to read:

1401. As used in this chapter, "hospital" means any institution, place, building, or agency which maintains and operates organized facilities for one or more persons for the diagnosis, care, and treatment of human illness, including convalescence and including care during and after pregnancy, or which maintains and operates organized facilities for any such purpose, and to which persons may be admitted for overnight stay or longer. "Hospital" includes *general hospital* and *specialized hospital* [sanatorium, nursing home, and maternity home].

SEC. 4. Section 1401.1 is added to said code, to read:

1401.1. As used in this chapter, "nursing and rest home" means any institution, home, place, building, or agency which maintains and operates facilities for one or more persons, admitted thereto for overnight stay or longer, for the care and treatment of human illness, or for any of the following purposes:

(a) Convalescence.

(b) Care for nonpsychotic senile persons.

(c) Care for the infirmities of old age, including personal attention, assistance and supervision.

(d) Physical housing furnished in conjunction with the care of persons 65 years of age, or older.

Maternity nursing homes and tuberculosis nursing homes licensed under this chapter shall be restricted to the care of maternity or tuberculosis cases, respectively.

SEC. 5. Section 1404 of said code is amended to read:

1404. Each license issued under this chapter shall expire at midnight on the thirty-first day of December of each calendar year and shall be renewed automatically upon the payment of the fee provided for in Section 1403, unless the department finds, after hearing, that the hospital or nursing and rest home has not complied with the provisions of this chapter or the rules and regulations of the department, and returns the fee to the applicant.

SEC. 6. Section 1405 of said code is amended to read:

1405. No person, political subdivision of the State, or other governmental agency within the State, shall continue to operate, conduct or maintain an existing hospital or nursing and rest home after January 1, 1946, without having applied for and obtained a license as provided in this chapter.

SEC. 7. Section 1407 of said code is amended to read:

1407. Every hospital and every nursing and rest home for which a license has been issued shall be periodically inspected by a duly authorized representative of the state department. Reports of each such inspection shall be prepared by the representative conducting it upon forms prepared and furnished by the department filed with the department.

SEC. 8. Section 1408 of said code is".

PRINTER'S NOTE—There being no 7-point strikeout type available, the material which should appear in strikeout type in the following amendment is indicated by being enclosed within brackets.

Amendment No. 5

On page 1, after line 25, insert

"SEC. 9. Section 1411 of said code is amended to read:

1411. The state department, after consultation with the advisory board and receipt of the recommendations of the advisory board in respect thereto, shall make and promulgate, and may thereafter modify, amend, or rescind, reasonable rules and regulations to carry out the purposes of this chapter, classifying hospitals and nursing and rest homes and prescribing minimum standards of safety and sanitation in the physical plant, or diagnostic, therapeutic and laboratory facilities and equipment for each class of hospitals.

SEC. 10. Section 1415 of said code is amended to read:

(a) Any hospital or nursing and rest home conducted, maintained or operated by the United States Government or a duly authorized agency thereof.

12880. In furtherance of the development, control and conservation of the water resources of the State it is the policy of the State to provide financial assistance from the Water Development Fund to public agencies for the construction of projects for water development in which there is a state-wide interest by making grants or loans, or both, and by participating in the construction and operation of such projects, in accordance with this section.

(a) As used in this section, "project" means any construction or improvement by a public agency for flood control, for the diversion, storage, distribution or other use of water primarily for domestic, municipal, agricultural, or industrial purposes, and for the production of power. "Public agency" means any city, county, district or other political subdivision of the State.

(b) The proposed project may be approved for assistance only if it is determined that the project substantially conforms to The California Water Plan, is engineeringly feasible, economically justified, and, if a loan is proposed, that there is reasonable assurance that the public agency can repay it.

(c) Grants in furtherance of a project may be made for the following purposes:

(1) For the part of the construction cost properly allocated to the preservation and enhancement of fish and wildlife incidental to the primary functions of the project.

(2) For the part of the construction cost properly allocated to recreational benefits of state-wide interest that are incidental to the primary functions of the project.

6827. Leases for the extraction and removal of oil and gas deposits may be made by the commission to the highest qualified bidder, or joint bidders, as provided in this chapter. Such a lease shall include all oil and gas deposits in the leased land and be for a term of 20 years and for so long thereafter as gas or oil is produced in paying quantities from the leased land, or lessee shall be diligently conducting producing, drilling, deepening, repairing, redrilling or other necessary lease or well maintenance operations on the leased land. Any lease heretofore issued under this chapter for a term of 20 years, or any renewal or extension thereof, may at any time or times prior to its expiration be extended upon such terms and conditions and for such period of time as the commission deems for the best interests of the State or as the Legislature may provide; provided further, that upon the lessee's timely application therefor the commission may issue a new lease in exchange for any lease issued for a term of 20 years, or any renewal or extension thereof; such new lease shall be issued at the same royalty and upon the same terms and conditions as the lease for which it is exchanged, unless the commission and the lessee shall otherwise agree, except that the term of such exchange lease shall be for a term of five years and for so long thereafter as oil or gas is produced in paying quantities, or lessee shall be conducting producing, drilling, deepening, repairing, redrilling or other necessary lease or well maintenance operations on the leased land.

When the state tide and submerged lands are offered for lease by the commission, unless the commission determines that such lands are [lands not] within the known geologic structure[, as determined by the commission,] of a producing oil or gas field at the date of issuance by the commission of an invitation to bid for an oil or gas lease thereon, the commission shall specify a flat-rate royalty to be paid under such lease of [12½] 16½ percent in kind, or of [12½] 16½ percent of the current market price or the price received for the production removed or sold from the leased land, subject to an allowance for oil treatment and dehydration of not to exceed five cents (\$0.05) per net barrel for the royalty oil and shall specify a flat royalty of 10 percent of the current gross market value or price received for all dry gas, natural gasoline, and other products extracted and saved from the gas produced from the leased land, except gas used for lease use or reinjection in state lands, and an annual rental payment in advance of not to exceed one dollar (\$1) for each acre of the land subject to the lease at the rental date. Unless the commission decides to reject all bids pursuant to Section 6836, the lease of the parcel or tract which is the subject of the bid shall be awarded to the qualified bidder who undertakes to pay the highest cash bonus in addition to satisfying the royalty and rental requirements and all other provisions of the lease.

When state lands, including tide and submerged lands, offered for lease by the commission are lands within the known geologic structure, as determined by the

days written notice thereof to the city or county, or both such city and county, making such request, and to the Department of Natural Resources, and shall publish such notice. The commission in its discretion and irrespective of any such requests may hold such hearings as it shall determine. Published notices shall be given in the manner prescribed in Section 6834 of this chapter.

[Within thirty (30) days] *As soon as practicable* after such hearing the commission shall determine to offer the land for lease, as provided under Sections 6871.3, 6872 and 6872.1, unless the commission shall determine that the issuance of a lease as to all or a part of such land would result in an impairment or interference with the developed shore line recreational or residential areas adjacent to the proposed leased acreage, or the commission may determine to offer such land for lease as to all or a part thereof and include in the offer for lease such reasonable rules and regulations which, in the opinion of the commission, are necessary for the exploration, development, and operation of said lease in a manner which will not impair or interfere with said developed shore line recreational or residential areas; provided, however, that no tide or submerged lands shall be offered for lease under any conditions, rules, or regulations which will result in a discrimination between bidders as prohibited by Section 6874.

The commission in determining whether the issuance of such lease or leases would result in such impairment or interference with the developed shore line, recreational or residential areas adjacent to the proposed leased acreage or in determining such rules and regulations as shall be necessary in connection therewith shall at said hearing receive evidence upon and consider whether such proposed lease or leases would

(a) Be detrimental to the health, safety, comfort, convenience, or welfare of persons residing in, owning real property, or working in the neighborhood of such areas;

(b) Interfere with the developed shore line, residential or recreational areas to an extent that would render such areas unfit for recreational or residential uses or unfit for park purposes;

(c) Destroy, impair, or interfere with the esthetic and scenic value of such recreational, residential or park area;

(d) Create any fire hazard or hazards, or smoke, smog or dust nuisance, or pollution of waters surrounding or adjoining said areas.

Authority to hold the hearings provided in this section may be delegated by the commission to its officers or employees."

The resolution shall be submitted to the county superintendent of schools. If the resolution is approved by the county superintendent of schools it shall, if it involves a sum in excess of one thousand dollars

(\$1,000), be published in the same manner as the budget of the school district concerned is published. Upon the approval of the resolution and, where its publication is required, following its publication, the amount named in the resolution shall be appropriated to the major classification or classifications from the general reserve as set forth in the resolution.

The county superintendent of schools shall approve any resolution for the appropriation of income provided from state or federal sources for emergency needs of the school district to the extent that such income was not anticipated in the budget of the school district. Nothing in this section shall be construed to authorize the appropriation for current year purposes of income which would deplete the general reserve for the next succeeding fiscal year as provided in the budget of the school district.

On the first day of July of each year, the general reserve together with unexpended balances of appropriations and income in excess of anticipated income for the preceding fiscal year shall be placed to the credit of the school district, and [the school district shall include] all moneys so credited [in the balance shown in] *shall automatically become subject to the budget for the [ensuing] fiscal year then commencing.*

(b) Whether the adoption and carrying out of the redevelopment plan is economically sound and feasible.

SEC. 13. Section 33732 of said code is amended to read:

33732. *If alternative plans are submitted, the legislative body shall give preference to the plan which it deems will best redevelop the project area in conformity with the purposes and policy of this part and the master or general plan for the community and which requires the least interference with the continued enjoyment of existing property rights [consistent with the purposes of this part] and the maximum of owner participation.*

SEC. 14. Section 33746 of said code is amended to read:

33746. After the adoption of the redevelopment plan or of any urban renewal plan or of any combination of such plans and the expiration of the period provided for in Section 33745, further proceedings which affect the specific area in which the owners refused to participate with reference to redevelopment of the project area shall be stayed for 30 days.

[Any action to contest the validity of the proceedings for the adoption of a redevelopment plan is barred upon the expiration of such period of 30 days. In any action commenced after the expiration of the 30-day period, except as to matters affecting jurisdiction, the validity of the proceedings is conclusively presumed.]

[Upon the expiration of the 30-day stay, the agency has the authority to execute the plan.]

Within said period of 30 days a proceeding may be commenced in the superior court of the county in which land affected by the plan is situated in which the findings and determinations of an agency and of a legislative body, or of either of them, in the adoption and approval of any redevelopment plan or of any urban renewal plan or of any combination of such plans may be reviewed. Such review shall be had in the manner prescribed by Section 1094.5 of the Code of Civil Procedure.

If a proceeding is timely brought under the provisions of this section, no action to condemn property affected by the plan shall be prosecuted to judgment until and unless judgment in the proceeding to review the plan has become final.

SEC. 15. The provisions of this act shall not apply to any redevelopment plan, urban renewal plan, or combination of such plans approved by ordinance prior to June 30, 1957, but shall apply to all such plans approved after that date."

Amendments read, and adopted.

Amendment No. 4

On page 1, between lines 2 and 3, insert

"19825. (a) The provisions of Part 1 (*commencing at Section 15000*) of this division and of Chapter 1 (*commencing at Section 19000*), Chapter 2 (*commencing at Section 19100*), and Chapter 3 (*commencing at Section 19300*) of Part 3 of this division relating to design, construction, reconstruction, movement, conversion or alteration of buildings shall not apply within any city having and enforcing a local ordinance prescribing minimum standards equal to or greater than such provisions of this division; [provided, however, such provisions of Part 1 of this division, which are presently applicable to buildings erected prior to the adoption of a local ordinance, shall apply to such buildings.] *such local ordinance shall supersede such provisions of this division.*

(b) No provision of this chapter shall be construed to authorize a reduction in or exemption from the provisions of Chapters 3 (*commencing at Section 15250*) and 4 (*commencing at Section 15351*) of Part 1 of this division or a reduction in the maintenance, sanitation or occupancy provisions of Part 1 of this division.

(c) The provisions of this chapter shall be effective only in a city where the legislative body determines that an ordinance described in subdivision (a) of this section is in force and effect and so notifies the state department presently charged with enforcement of the provision of this division if a state department be so charged.

SEC. 2. This act is an urgency measure necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

Cities and counties in California in cooperation with the Urban Renewal Program of the Federal Government have under way urban renewal programs as contained in the Federal Housing Act of 1949 as amended. To qualify for proffered federal aid in such programs communities are required to enact and enforce housing codes commensurate with modern, sound housing and neighborhood standards. Many provisions of the State Housing Act have been deemed inadequate in meeting such standards and Chapter 9 of Division 13 of the Health and Safety Code has been interpreted as prohibiting cities and counties from enacting and enforcing a housing ordinance that is more restrictive in its provisions than are the provisions of the State Housing Act."

Amendment No. 5

On page 1, strike out lines 3 to 6, inclusive.

Amendments read, and adopted.

Bill ordered printed, and re-referred to Committee on Public Health and Safety.

(3) Within five days after the first publication of the notice, the tax collector shall mail a copy of it by registered mail to the last assessee of each portion of the property at his last known address. It is not necessary to mail a copy of the notice

to any party who files with the tax collector a written acknowledgment of receipt of a copy of the notice or a waiver of the notice.

(4) The cost of giving the notice shall be paid by the taxing agency by which the property is to be or may be purchased.

(5) Affidavits showing that the notice has been given as prescribed shall be filed in the office of the county tax collector.

(6) If any portion of the property is not redeemed within 21 days after the first publication and mailing of the notice, the tax collector shall, without charge, execute to the taxing agency a deed to the unredeemed property.

(7) On the execution of the deed, all right to redeem the property from sale to the State is terminated. The deed conveys to the taxing agency all the State's interest in the property.

(8) If the lands as to which the right of redemption has been thus terminated are not sold into private ownership within the period the taxing agency is exclusive sales and rental agency, the taxing agency shall execute a deed to the State reconveying to the State all the right, title and interest of the State in the property which such taxing agency obtained by the deed of the tax collector pursuant to this chapter. Thereafter, such property shall be held as tax-deeded property by the State. The Controller shall provide uniform blanks on which such reconveyances shall be made.

MOTION TO PRINT OPINION OF LEGISLATIVE AUDITOR

Senator Cobey moved that the following opinion of the Legislative Auditor regarding Senate Bill No. 325 be printed in the Journal in 10-point type.

Motion carried.

OPINION OF LEGISLATIVE AUDITOR

JOINT LEGISLATIVE BUDGET COMMITTEE

CALIFORNIA LEGISLATURE, SACRAMENTO, May 10, 1957

*Hon. James A. Cobey, Senator, Twenty-fourth District
Room 4070, State Capitol, Sacramento, California*

DEAR SENATOR COBEY: Pursuant to your request, submitted herewith is a corrected statement of the estimated effect of Senate Bill No. 325 as proposed to be amended by your Fish and Game subcommittee, on the Fish and Game Preservation Fund in Fiscal Year 1957-58. Further clarification of the dates on which the various code sections are to become effective has necessitated this alteration in the schedule originally submitted to your subcommittee.

To apprise you of the necessity for and effect of the proposed categorical license and fee increases, following is a resume of each:

Sport and Commercial Fishing

In reference to the attached Fish and Game Revenue and Expenditure Table, it is estimated on the basis of available data that the total Marine Fishery Branch operation is adequately sustained according to current income, and for that reason your subcommittee excluded the ocean sport fisherman from any license increase. However, in recognition of the efforts of this branch in attempting to sustain the commercial fishing industry, it was felt that that industry should defray a greater proportionate share of the costs involved. For that reason, and in consideration of the economic benefits involved, your subcommittee felt justified in recommending a \$10 increase in the commercial fishing license fee.

Regarding the sport fishing license increases recommended, the table further illustrates that the inland fisheries activity is one of major expense and is responsible for the greatest proportion (74 percent) of the existing deficit in departmental operations.

It has been ascertained that the catchable trout program and other programs for the enhancement of the mountain trout fishery constitute the most expensive portion of the inland fishery program. It is felt that those sportsmen who choose to avail themselves of trout fishing should bear the cost of that program, and for this reason your subcommittee has recommended a \$5 license for that category. The \$5 license also permits the purchaser to fish in any waters of the State thus permitting this license holder to take advantage of each program and facility of all the department's fisheries activities.

The subcommittee felt that special consideration should be afforded those sportsmen who do not avail themselves of the mountain trout program but who do fish in both the ocean and inland waters. It was felt that although this group should not be penalized for the costly trout program, it should however help defray the deficiencies existing throughout the inland fishing operation attributable to special studies, increased patrol costs and general increases in operational costs due to increased wages and related expenses since 1947, the date of the last license increase. Your subcommittee felt that a \$4 license fee was justified under these conditions, which license affords the purchaser the

opportunity of fishing for both ocean and inland fish species including steelhead trout but excluding all other types of trout.

Hunting

Since the aforementioned last license increase passed by the Legislature in 1947, over-all costs of the Department of Fish and Game on programs approved by the Legislature have increased 97 percent while income has only increased 20 percent. Some of the specific programs have grown in scope to meet population pressures in such a manner as to exceed the revenues originally felt sufficient to defray them. Among those programs, and contributing to the departmental operation deficiency, are the pheasant and deer management ones, as is illustrated in the accompanying table. Salary increases, game food costs, more intensive management on reduced game habitat and expanded patrol made necessary as more hunters go into the field are a few factors contributing to these deficiencies.

Your subcommittee felt that those programs directly affected by and benefitting certain hunters should be defrayed by those people, and therefore recommended that both the deer and pheasant tags be increased by one dollar to accomplish that purpose.

Furthermore, because of the factors outlined above which have increased the over-all cost of departmental operation in the last decade, your subcommittee has recommended a general hunting license increase of one dollar to insure an equitable distribution of sportsman participation in defrayment of departmental expenditures.

The table presented as an adjunct to this report is as accurate as your committee can determine in the absence of a detailed cost accounting system in the department. It is difficult to pro rate wildlife protection and administrative overhead costs to the various functional programs in view of the overlapping nature of both activities. However, it is felt that in order to solve the critical deficiency operation of the department without which solution many programs would have to be seriously curtailed in the face of the continuing and increasing need of expanding rather than reducing them, your subcommittee feels that the license and fee increases recommended are in the best interest of both sound administrative management and the sportsman.

Your subcommittee further feels that the \$250,000 recommended in the amendments to Senate Bill No. 325 to be appropriated out of the additional income to the department for a thorough functional study of the State's fish and game programs will afford the Legislature tools to insure the economical application of departmental revenues.

Sincerely,

A. ALAN POST, Legislative Auditor

1831. To enable the board to perform its constitutional duties under this article and Sections 9 and 14 of Article XIII of the State Constitution, the board shall make a survey, [annually] *not less often than triennially*, in each county to determine the [relationship between the total value of land, improvements and tangible personal property entered upon the roll by the assessor, and the total market value thereof. As a basis for this determination, the board shall consider sales and other appraisal data compiled by appraisers competent to determine accurately the market value of the property. These data shall relate to representative samples of property subject to local assessment in each county sufficient in number and dispersion to assure an adequate cross-section of the taxable wealth within the county, both as to the classes of property enumerated and as to the location thereof.] *of market value of all locally assessable tangible property as of the lien date for the last equalized roll. As a basis for this determination, the board shall ascertain the market value of a sample of locally assessable tangible property sufficient in size and dispersion to insure an adequate representation in each county of the several classes of property throughout the county. In ascertaining the market value of the property in the sample the board shall consider appraisal data compiled by competent appraisers. The board shall make surveys each year in no fewer than 18 nor more than 22 counties which shall start not sooner than the third Monday in July following the lien date of the last equalized roll and which shall be completed not later than June 30th of the subsequent year.*

No property shall be used as a sample pursuant to this section more frequently than once every four years.

As soon as appraisals have been made in any county by the board pursuant to Section 1831, the board shall give the assessor of the county a reasonable opportunity to examine and discuss the appraisals with the board appraisers. The board shall give the assessor a reasonable opportunity to examine and discuss its determination of the market value of any property as to which it has made such an appraisal.

SEC. 3. Section 1833 is added to said code, to read:

1833. After completing a survey pursuant to Section 1831, the board shall estimate any change that may have occurred in the total market value of tangible property subject to local assessment between the lien date of the roll for which the survey was made and the lien date of the current roll. The board shall use as the basis for such estimate data on population, school enrollment, retail sales or other factors indicative of change or lack of change in the total market value of the property.

The estimate shall be completed on or before the March 31 which immediately follows the completion of a survey made pursuant to Section 1831, and immediately thereafter a statement of the estimate shall be given to the county assessor.

SEC. 4. Section 1834 of said code is amended to read:

1834. *On or before July 15th of each year the board shall determine the relationship between the total assessed value of the tangible property on the current local roll of each county and make its estimate of total market value. The board shall transmit promptly to the county assessor and to the board of supervisors of each county a notice of its determination.*

If the county, through its assessor or board of supervisors, desires to be heard with respect to the assessment ratio [based upon the survey] *so determined for the county*, opportunity for such hearing shall be afforded by the board [between the third Monday in July and the third Monday in August] *prior to August 10th*, upon application therefor in writing filed not later than [the first Monday in August] *July 25th*. The application shall specify in what respects the county believes that the determination of the relationship between the assessed value and the market value of the property within the county is in error. *In the absence of a timely application, the determination is final, and no hearing is required with respect to any equalization action by the board based upon the assessment ratio so established.*

SEC. 5. Section 1836 is added to said code, to read:

We realize, O Lord, that all authority is from Thee and that the work before us will be acceptable only if it is guided by Thy wisdom and helped by Thy grace. Be with us then in all our work so that our humble prayer "Thy will be done on earth as it is in heaven" may be pleasing and acceptable to Thee and merit Thy benediction upon our every effort. Thou, O Lord, Who has assured us of Thy ever ready assistance, aid these Thy representatives and all who labor with them. Defend them from all danger from without and lead them always along the way of Thy commandments. Grant that each one may challenge the responsibilities that lie before him with wisdom, confidence and courage with a new and stronger faith in our government. Bless those who are gathered here in this Chamber as servants of humanity; endow each one with an earnest zeal of giving unto others the example of fearlessness in Thy service and bestow upon all the full realization of charity and kindness required in our dealings with our fellow man. *Mr. J. A. Beek, Secretary, State Senate
State Capitol Building, Sacramento, California*

DEAR MR. BEEK: Vice President Corley has asked that I send you copies of a report prepared under the auspices of the university's Committee on Research in Water Resources entitled "Sediment Problems in California." Please note particularly pages 135 to 145 which summarize the sedimentation problems discussed at this conference and page V, which lists the participants.

This conference on sedimentation problems was one of a series sponsored by the university in response to the Senate Bill No. 67 of the 1956 Session of the Legislature. President Sproul appointed a committee under the chairmanship of Vice President Wellman to consider

- "(a) A review and summary of existing university research including available facilities—
- (b) A prospectus of university research which may contribute to fundamental knowledge in the field—
- (c) Suggestions for the coordination of research efforts, present and prospective, to assure that programs will be in keeping with the best utilization of the resources of the state-wide university."

The committee has arranged nine conferences of experts in various aspects of the over-all water resources field for the purpose of defining those areas of research which the university might appropriately undertake.

You may not have received a copy of the proceedings previously distributed on "Recreational Uses of Impounded Water" and I enclose a copy of that report also. Copies of other proceedings will be sent to you as soon as they are bound.

Should you desire more copies of these reports, we will be glad to furnish them.

Sincerely yours,

"SECTION 1. Section 14631.1 is added to the Education Code, to read:

14631.1. Retirement allowances payable for time commencing on October 1, 1957, are hereby increased to the amount they would be if the provisions of Sections 14633 and 14641 as they exist on that date had been in effect on July 1, 1956.

This section does not authorize any decrease in any retirement allowance, nor does this section give any retired person, or his successors in interest, any claim against the State for any increase in any retirement allowance paid or payable for time prior to October 1, 1957.

SEC. 2. Section 14633 of said code is amended to read:

14633. The retirement allowance in Section 14632, exclusive of the annuity in subdivision (c) of that section, but when added to the retirement allowance, prior to optional modification, the person is entitled to receive from a local retirement system, shall be, by increase in the annuity under the Retirement Annuity Fund, at least seventy dollars (\$70) per year, multiplied by the member's years of service, not to exceed forty (40); provided, the retired member is at least 60 years of age at the time of retirement. If retirement is at an age less than 60 years, the minimum retirement allowance under this section is an amount [actuarially equivalent to the value at the lesser age] *equal to a fraction of the minimum retirement allowance calculated under the preceding [sentence, deferred to the age of 60 years] sentence, said fraction being that set forth in Section 14635 opposite the member's age at retirement, taken to the preceding completed quarter year, in the column applicable to the member's sex.* For any member under retirement who re-enters membership in the retirement system and subsequently retires, the lesser age to be taken to the preceding quarter year, in the next preceding sentence, for calculating the minimum retirement allowance under this section, shall be determined by deducting from the member's age at the subsequent retirement, the aggregate time during which the member was under retirement prior to re-entry into membership in the system; *provided, however, that the fraction to be taken at such adjusted lesser age shall not be less than nine-tenths if the subsequent and prior retirements were for disability.* No retirement allowance shall be increased under this section to exceed, annually, 75 percent of the [average annual compensation earnable by the member during the three (3) years immediately preceding his retirement] *final compensation of the retired member.*

SEC. 3. Section 14641 of said code is amended to read: "

Recommendation of the Governor

In accordance with Article IV, Section 34, of the Constitution, the Governor presented the following communication recommending the consideration of Senate Bill No. 1995.

STATE OF CALIFORNIA, GOVERNOR'S OFFICE

SACRAMENTO, April 5, 1957

*To the Honorable Members of the Senate
Sacramento, California*

GENTLEMEN :

Senate Bill No. 1995, "An act relating to the planning, financing, construction and operation of the facilities of the San Luis Project which may be used jointly by the State and the United States, and making an appropriation therefor, and declaring the urgency thereof, to take effect immediately,"

in my opinion constitutes an emergency bill within the meaning of that term as used in Section 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

This bill appropriates \$1,000,000 from the Investment Fund to the Department of Water Resources for state participation in the San Luis Project. This money may be advanced to the United States Department of Interior for the preparation of plans and specifications for the construction of state-federal joint-use facilities. Also, the Department of Water Resources may enter into an agreement with the United States providing for such joint use of the San Luis Project as an integrated part of the State's Feather River Project and of the Federal Central Valley Project, and that upon the repayment to the United States of the reimbursable federal costs such facilities shall be conveyed to the State. The authority given the Department of Water Resources is not to be exercised until the enactment of federal legislation authorizing federal participation in the San Luis Project, and the execution of such joint-use agreement. Further, if moneys are advanced by the State and the cooperative agreement is not executed, the United States must reimburse the State for such advances. The enactment of this bill will speed the passage of the enabling federal legislation. This joint-use project will meet the critical water shortage in the western and southern portions of the San Joaquin Valley. The money to be advanced by the State will expedite the commencement of this project, and should advance its completion by at least a year. For these reasons, it is urgent that this bill be acted upon forthwith and that the funds provided in it be made immediately available.

I therefore recommend consideration of Senate Bill No. 1995 as an emergency measure.

Respectfully submitted,

GOODWIN J. KNIGHT, Governor

MOTION TO PRINT REMARKS

REMARKS BY SENATOR MILLER REGARDING SENATE BILL NO. 653

Mr. President and Members of the Senate:

I rise to move that Senate Bill No. 653 become law, the Governor's veto notwithstanding. Before I make that motion I desire to present to you the issues involved.

The subject to which I address myself, in my opinion, is the most important and vital one which the Senate will consider this entire session. It is important because it goes to the very foundations of our form of government. If we ignore this issue our power to deal with all other matters is jeopardized.

Our founding fathers wisely provided for a division of government with three separate branches. The authority vested in the executive branch was not intended to give the executive power to do more than indicate general direction; policy was assumed to be the proper business of the Legislature.

I wish therefore to discuss first of all the policy involved in the question requiring executive appointments be made with the advice and consent of the Senate.

This policy has long been an established one in Federal Government. The President of the United States must submit not only his department heads (the cabinet members) but their deputies (the assistant secretaries), all appointments to commissions such as the Interstate Commerce Commission, and the Federal Communications Commission, all ambassadors, all judges, and officers of the military and, in fact, he cannot even appoint a postmaster without submitting the appointment to Congress.

In California the policy has been established by the people in the Constitution. Members of the Public Utilities Commission, Fish and Game Commission, State Personnel Board, Alcoholic Beverage Control Appeals Board and the Director of Alcoholic Beverage Control are all subject to Senate confirmation by a mandate of the people of this State who wrote the specific provisions into the Constitution. The

Legislature has consistently followed the people's will in this matter in the creation of new offices and since the 1930's most of the new offices established are, under present law, subject to confirmation. These include:

Obviously if it is sound to require confirmation of the directors of some departments it is equally sound to require the same of all others.

The federal policy as it has been adopted in part in this State has always seemed most wise to me for a number of reasons not the least of which is that it maintains proper authority with the Legislature.

The Governor is, of course, elected by the people and is responsible to the people. Not so with his appointees. They are removed from direct responsibility to the people and without the requirement of Senate confirmation are completely removed from the people's representatives.

In such circumstances appointees often become removed from the public to the point they are unresponsive to the public will.

This is particularly true when appointees are reappointed and even carried over by reappointment from one governor to another. Some of these become not only experienced in the art of circumventing legislative policy decisions but imbued with the idea *they* and not the Legislature set the policy.

Not only does Senate confirmation afford some opportunity for the people's representatives to protect their constituents from this type of bureaucratic person but more important it affords the people an opportunity, through their elective representative, to protect themselves against a bad appointment in the first instance.

I ask you to remember that the appointments we are here concerned about are persons to whom we, the Legislature, have delegated authority to carry out the policies established by the Legislature—they are persons whom the Governor appoints to carry out that policy and to act for him in carrying out the will of the people. I ask you to remember that in a state of this size the Governor cannot personally keep track of every action of his many employees—he cannot in fact always have full knowledge concerning the people he proposes to appoint.

I am sure each of you in your own minds can think of some appointment made by a governor which, if you had an opportunity to prevent you would have done so.

I can think of at least two occasions when a governor appointed persons to high office who did not even meet the legal requirements of qualification for the offices to which they were appointed.

I can think of another appointment of a man to high office who had twice run against a Member of this Senate. Gentlemen, that member sits in this Senate today while the man who twice ran against him sits across the street occupying a high office and is in a position to influence decisions on important state matters which could affect adversely the Senator's district and his ability to be re-elected.

A further protection which confirmation provides is that wherein the Governor may become mentally or physically incompetent with the result that his secretaries are in fact making the appointments and merely securing the Governor's signature despite the fact that he is not mentally or physically competent to make proper decisions.

Under the Constitution of this State it is provided in Article V, Section 16 "In case of impeachment of the Governor * * * his absence from the State, or his other temporary disability to discharge the powers and duties of office, then the powers and duties of the Office of Governor shall devolve upon * * * the Lieutenant Governor."

As I read the section there appears to be two practical weaknesses. There is no reference to what happens if the disability is other than temporary—in other words if he is permanently disabled—but the glaring weakness from a practical standpoint is that it does not say who is to determine whether he is disabled to the point he cannot discharge his powers and duties. Gentlemen, it is the same situation which has recently caused considerable question in the Federal Government.

I think most of you remember the situation when Rolph was Governor and became ill and was placed in a sanitarium. He was not disqualified from continuing to exercise the powers and duties of the Office of Governor but as a practical matter his secretaries were making the appointments.

Now the bill under discussion simply provided that the Superintendent of Banks *in the future* be appointed with the advice and consent of the Senate.

Senate Bill No. 653 was introduced on January 16th. It was first heard in Senate committee on March 21st. It passed the Senate without a dissenting vote on March 25th. The vote was 35-0. It was not heard in Assembly committee until April 23d, a month after passage in the Senate. It passed the Assembly on April 26th by a vote of 67-0.

The bill, as the record shows, was never amended and cannot in any sense be charged with being hastily passed at any point along the way.

The Governor in his veto message states his objections to be, and I quote: "This provision violates a basic rule of public administration that the authority and the responsibility for any act be vested in the same person. When an appointment is made by the Governor of a director of a department to serve at his pleasure, the Governor should be solely responsible to the people for that appointment.

"I have been concerned at the trend in recent years to place more and more restrictions upon the Executive in the exercise of his constitutional functions, and I am firmly of the opinion that this trend should not be further extended." End of quote.

Gentlemen of the Senate, the Governor raised no such objections to the measure which established the State Director of Alcoholic Beverage Control, or the State Director of the Water Department. To the contrary he issued many glowing statements in support of these measures, yet both went beyond requiring Senate confirmation and reserved to the Legislature the power of not only approving the appointments but discharging the appointees at any time after the approval of their appointments.

So what we have before us in this veto message is something which strikes even harder at basic foundation and structure of government than merely an objection to the Legislature's reserving the power to approve the executives appointments. What we have here is an abusive use of the veto power which if permitted to stand is a blow to the powers and authority of the Legislature to determine policy for the executive branch of government.

The veto power granted the Governor is not one to be used whimsically, capriciously or for the purpose of political retaliations. It is a power granted to the Governor for the purpose of protecting the public from sectionalism, expenditures for which there are not sufficient funds, and inadvertent errors in legislation.

I think you will find that in the past governors have generally used the veto power most sparingly and only as a reserve in situations where errors have been made in legislation presented to the Executive or when appropriations have been voted beyond the Executive's ability to meet the expenditures which would be required. I believe you will find few examples of it having been used simply because the Executive felt that he would not have voted for the measure had he been a Member of the Legislature. I know you will find that in the 1955 Session the Governor did not veto a single Senate bill. (Some which passed after the veto date were unsigned -pocket vetoed—but none were returned to the Senate vetoed).

For guidance on this subject I think we should look to the Federal Government.

Eight of our presidents never exercised the veto power. Washington only exercised it twice; Madison six times; Monroe once; Jackson twelve times; and Tyler nine.

President Cleveland probably used the veto more often than any president in vetoing 358 measures, but most of these were private pension bills of an indefensible character.

In understanding the presidential attitude on the veto I would recite to you the statement of President Harrison, who said, and I quote:

"The President does not deal with bills submitted for his approval upon the principle that he should approve only such as he would have voted for if he had been a Member of Congress. Much deference is due to the Congress, and vetoes have customarily been used only when the fault in the legislation was serious in itself or as a precedent."

Gentlemen, the Executive is not a king nor a dictator. This is a people's government and the people govern through their elected representatives with the Legislature as the meeting place for their representatives. By this method the people govern themselves, and the executive branch of government must carry out the policies which the people have determined.

In exercising a veto power simply because he does not like the policy decided by the people's representatives, the Executive in effect is declaring that he, and not the people, will make the laws of the State and that the representatives of the people cannot impose policy upon the Executive.

In this situation the Legislature suffers a most dangerous weakening of power and if allowed to continue will lose its power altogether.

A president of the United States has said, and I quote:

"The weakening of the legislative arm leads to encroachment by the Executive upon the legislative and judicial functions, and inevitably that encroachment is upon individual liberty. If we examine the fate of the wrecked republics over the world we shall find first a weakening of the legislative arm." Gentlemen, that statement was made by *Herbert Hoover*.

I would like to contrast that with a statement made by Woodrow Wilson. "The President," he said, "is at liberty both in law and in conscience to be as big a man as he can. His capacity will set the limit. He is entitled to seek the leadership of the Nation because if he succeeds it is because the President has the Nation behind him and Congress has not."

I do not subscribe to that. I deny that the people's government is nothing more than one man and his appointees. I hold that this is in fact a people's government, controlled at all times by the people through their elected representatives, and the function of the Chief Executive is to carry out the people's will. If we allow the powers of government to become concentrated in one hand we have as Madison said, and I quote, "the very definition of tyranny," close quote. Since Madison, we have witnessed the terrible fate of the world when a Mussolini, or a Hitler, can destroy government and grab the power over a nation in the palm of one hand.

Gentlemen, I ask that you consider this question carefully with all of its ramifications and consider whether or not an executive should be allowed to veto the unanimous action of both houses simply on the

basis that he does not like the policy. In this case it is even more than that because the policy has long been established by the Legislature and accepted by every governor, including the present one.

I think when you have considered all aspects you must vote to override this veto. Gentlemen, if the Legislature can err, so can the Governor. In this instance I think he has erred badly. His point as to "restrictions upon the Executive in the exercise of his constitutional function" is not well taken because it ignores the provisions which the people have voted into the Constitution at every opportunity in the past 40 years to make the governors' appointments subject to confirmation.

Gentlemen, you have all witnessed civil service heads of divisions attempting to tell the Legislature what the policies of this State shall be. If we are to have nothing to say about the appointive heads of the various departments who by law must carry out the policies which we sit here many long and arduous hours every year trying earnestly to establish, I ask you: *What in the world are we doing here at all?*

How else can we assure ourselves that the appointments made by the Governor are qualified, competent, honest and able persons. How can we assure the people of our districts that the persons appointed to head up agencies which have regulatory powers over them which have the sum and substance of laws passed by this Legislature are proper persons.

The Governor's personal staff is one thing but when it comes to persons who have jurisdiction over my people and who can enforce regulatory powers to the point of having my people fined or imprisoned I want to have something to say about it. I want to be sure that the people of my district are protected.

Gentlemen, the idea of the people's representatives enforcing the policies which they have established has been so strong in this State that we have witnessed legislation authored by such persons as Senators Hatfield, Hulse, Swing and Rich establishing the Public Works Board, the Local Allocations Board, and the Wild Life Board, wherein legislative members sit on these boards to assure the Legislature that the policies established will be carried out.

And one final word, remember that in a large sense the power of the Legislature was greatly hampered by the adoption of the constitutional amendment several years ago limiting the length of the sessions. Gentlemen, under that provision the Legislature lost its power to remain in session or recess in order to force the Governor to either approve or reject a measure and still provide the Legislature the opportunity of overriding a veto. I ask you to exercise that power which yet remains with you and vote both to put into law a bill which simply follows a well established and well advised precedent and at the same time continue to retain the powers and authority vested in you as the representatives of the people of this State to decide policy for them.

Mr. President, I move that Senate Bill No. 653 become law, the Governor's veto notwithstanding.

I ask for an "aye" vote.

COMMUNICATIONS

The following communication was received and read, and ordered printed in the Journal:

PROPERTY OWNERS ASSOCIATION

SAN FRANCISCO, May 13, 1957

*Hon. J. A. Boek, Secretary of the State Senate
Capitol Annex, Sacramento*

DEAR MR. BECK: I know that you are interested in safeguarding localities from disastrous results of improperly placed freeways. Accordingly, there is forwarded a copy of a resolution adopted by a meeting of the Property Owners Association.

As you can see from the enclosure, the Property Owners Association, composed of 28,000 owners and small businessmen feels and urges that adequate local determination and protection will be assured, provided the route of a proposed freeway must be approved by the board of supervisors or by the city council as the case may be. Such protection will not stymie the construction of needed freeways any more than does the existing provision of the Street and Highways Code to the effect that an agreement for the required closing of streets must be obtained from the local governing body.

With kindest regards,

Sincerely,

CHRIS D. McKEON, Chairman

Resolution of the Property Owners Association

WHEREAS, The Property Owners Association composed of many thousand of home owners and small businessmen share the widespread opinion that local communities should be protected from the useless destruction of improperly placed freeways; and

WHEREAS, Local communities will be properly safeguarded by legislation requiring that the Highway Commission obtain the approval of the board of supervisors and city council of the route of a proposed freeway before the adoption of the route; and

WHEREAS, Senate Bill No. 297, or Senate Bill No. 2117, or Assembly Bill No. 1876, or Assembly Bill No. 3989 gives such protection; now, therefore, be it

Resolved, That the Property Owners Association urges the California Legislature to grant this protection to localities by adopting Senate Bill No. 297 or Senate Bill No. 2117, or Assembly Bill No. 1876 or Assembly Bill No. 3989; and be it further

Resolved, That a copy of this resolution be sent to the clerk of both bodies of our State Legislature and that copies be transmitted to the members of the Transportation Committees of the Senate and Assembly.

Adopted at a meeting of the Property Owners' Association on May 10, 1957.

Recommendation of the Governor

In accordance with Article IV, Section 34, of the Constitution, the Governor presented the following communication recommending the consideration of Senate Bill No. 659.

STATE OF CALIFORNIA, GOVERNOR'S OFFICE

SACRAMENTO, May 1, 1957

*To the Honorable Members of the Senate
Sacramento, California*

GENTLEMEN:

Senate Bill No. 659, "An act to add Sections 962, 963, 964, 965, and 966 to the Welfare and Institutions Code, relating to state contributions for construction of institutions for juveniles, and making an appropriation therefor,"

in my opinion constitutes an emergency bill within the meaning of that term as used in Section 34 of Article IV of the Constitution of the State of California, the consideration of which should not await the final enactment of the Budget Bill.

This bill appropriates \$1,100,000 from the General Fund for a program of state assistance to the counties in the construction of juvenile homes and juvenile ranch and forestry camps. It provides that allocations of this state money shall be made by the Youth Authority upon application of the counties, but that no allocation to a county shall exceed 50 percent of the cost of any such project approved by the Youth Authority. In view of the objective of this bill, its prompt consideration is desirable and action upon it should not be delayed until after final passage of the Budget Bill.

I therefore recommend consideration of Senate Bill No. 659 as an emergency measure.

Respectfully submitted,

GOODWIN J. KNIGHT, Governor

"SECTION 1. An article heading is added immediately preceding Section 21401 of the Public Utilities Code, to read:

Article 1. General Provisions

SEC. 2. Sections 21407, 21408, 21409, 21410, 21411, and 21412 are repealed.

SEC. 3. Section 21407 is added to said code, to read:

21407. The provisions of Articles 2 and 3 of this chapter are enacted to conform the state law governing the operation of aircraft in this State with the federal rules and regulations governing such operations. If any of the provisions of such articles do not conform with the corresponding provisions of the federal rules and regulations due to changes in such federal rules and regulations, then such provisions to that extent shall cease to be operative.

SEC. 4. Article 2 (commencing at Section 21451) is added to Chapter 3, Part 1, Division 9 of said code, to read:

Article 2. General Operation Rules

21451. "Administrator" means the United States Administrator of Civil Aeronautics.

21452. "Category" means a classification of aircraft, such as airplane, helicopter, or glider.

21453. "Class" means a difference in basic design of aircraft within a category, such as single-engine land or multiengine sea.

21454. "Copilot" means a pilot serving in any piloting capacity other than as pilot in command on aircraft requiring two pilots for normal operations, but excluding a pilot who is on board the aircraft for the sole purpose of receiving dual instruction.

21455. "Dual instruction time" means that portion of the flight time during which a person is receiving flight instruction from a rated flight instructor on board the aircraft.

21456. "Flight instructor" means a pilot who is qualified to instruct other pilots and who has received a flight instructor rating.

21457. "Flight time" means the total time from the moment the aircraft first moves under its own power for the purpose of flight until the moment it comes to rest at the end of the flight.

21458. "Passenger" means an occupant of the aircraft in flight other than a crew member.

21459. "Pilot" is a person holding a valid pilot certificate issued by the administrator.

21460. "Pilot in command" means the pilot responsible for the operation and safety of the aircraft during the time defined as flight time.

21461. "Solo flight time" means the flight time during which a pilot is the sole occupant of an aircraft.

21462. "To pilot" means to be in command of the aircraft during take-off, in flight, or landing.

21463. "Type" means all aircraft of the same basic design including all modifications thereto except those modifications which result in a change in handling or flight characteristics.

21463.5. "VOR" is the symbol used to designate omnidirectional radio range.

21464. This article governs the operation of civil aircraft in this State.

21465. No aircraft, except foreign aircraft authorized by the administrator to be flown in the United States, shall be operated unless an appropriate and valid airworthiness certificate or special flight authorization and a registration certificate

issued to the owner of the aircraft pursuant to federal statutes or regulations governing aeronautics are carried in the aircraft pursuant to Section 21465.5, and the aircraft is identified in accordance with the requirements of federal statutes or regulations governing aeronautics.

21465.5. Any certificate, permit, or license required by the United States for an aircraft shall be carried in the aircraft at all times while the aircraft is operating in the State, shall be conspicuously posted in the aircraft where it may be readily seen by passengers or inspectors, and shall be presented for inspection upon the demand of any peace officer, any other officer of the State or of a political subdivision, or member, official, or employee of the commission, authorized by Section 21252 to enforce the aeronautics laws, or any official, manager, or person in charge of any airport upon which the aircraft lands, or upon the reasonable request of any person.

21466. No aircraft, except foreign aircraft authorized by the administrator to be flown in the United States, shall be operated unless there are available in the aircraft appropriate aircraft operating limitations set forth in a form and manner prescribed by the administrator, or a current flight manual approved by the administrator. An aircraft shall be operated only in accordance with its prescribed operating limitations.

21467. An aircraft shall not be flown unless it is in airworthy condition.

21468. When an aircraft has undergone any repair or alteration which may have appreciably changed its flight characteristics or substantially affected its operation in flight, such aircraft, prior to carrying passengers, shall be test flown by at least a private pilot appropriately rated for the aircraft, and a notation to that effect shall be entered by such pilot in the aircraft log.

21469. An aircraft shall not be flown, except for airworthiness flight tests, unless within the preceding 12 calendar months it has been given an annual inspection as prescribed by the administrator and has been found to be airworthy by a person designated by the administrator.

21470. An aircraft shall not be flown for hire, unless within the preceding 100 hours of flight time it has been given a periodic inspection by an appropriately rated mechanic in accordance with the periodic inspection report form prescribed by the administrator, has been found to be airworthy, and a notation to that effect has been entered by such mechanic in the aircraft log. The annual inspection required by Section 21469 will be accepted as one such periodic inspection.

21471. The registered owner of a certificated aircraft shall be responsible for maintaining and keeping available for inspection by an authorized representative of the administrator, the Civil Aeronautics Board, state or local law enforcement officer, and for transfer with the aircraft or engine, the following records:

(a) Aircraft and engine records which shall contain a current, accurate, and permanent record including the flight time of the aircraft and each engine, reports of inspections, minor repairs, and minor alterations of the aircraft structure, engines, and propellers. A mechanical device which records the total time of operation or the total number of engine revolutions may be used in lieu of individual flight entries if the totals of flight time are recorded in the aircraft and engine records at periodic intervals to enable compliance with the required inspections and maintenance procedures.

(b) A record of major repairs and alterations shall be maintained as required by federal statutes or regulations governing aeronautics. A reference to such major repairs and alterations shall be entered in the appropriate place in the aircraft records.

21472. A new record without previous operating history may be used for an aircraft engine rebuilt by the manufacturer or any agency approved by the manufacturer for such work; provided, such new record contains a signed statement by such manufacturer or agency giving the date the engine was rebuilt and such other information as the administrator requires.

21473. Except for aircraft in which the omnidirectional radio range (VOR) equipment is maintained, checked and inspected in accordance with a procedure approved by the administrator, no person shall operate an aircraft under instrument flight rules using the VOR system of radio navigation unless the aircraft VOR equipment has been operationally checked, both within the preceding 10 hours of aircraft flight time and within the preceding 10 days, and found to be within the limits of the indicated bearing error specified in this section for the particular check. The checks shall be conducted in accordance with either subdivision (a) or (b) of this section as follows:

(a) (1) If a Civil Aeronautics Administration operated or approved test signal is available at the airport of intended departure, a check of the VOR equipment shall be accomplished using this test signal. The maximum permissible indicated bearing error is plus or minus 4°.

(2) If a Civil Aeronautics Administration operated or approved test signal is not available at the airport of intended departure, a check shall be accomplished using a point on an airport surface designated by the administrator as a VOR system check point. The maximum permissible indicated bearing error is plus or minus 4°.

(3) If neither a Civil Aeronautics Administration operated or approved test signal nor a designated check point on the airport surface is available, a check shall be accomplished using an airborne check point designated as such by the administrator. The maximum permissible indicated bearing error is plus or minus 6°.

(4) In the event none of the checks prescribed in paragraphs (1), (2), and (3) of this subdivision can be accomplished, because of the unavailability of a check signal or point, the following airborne procedure shall be accomplished:

(i) Select the VOR radial which lies along the center line of an established VOR airway.

(ii) Choose a prominent ground point along the selected radial preferably more than 20 miles from the VOR ground facility and maneuver the aircraft directly over the point at a reasonably low altitude, and

(iii) Note the VOR bearing indicated by the receiver when over the point. The maximum permissible difference between the published radial and the indicated bearing is plus or minus 6°.

(b) If dual systems (defined as VOR units independent of each other with the exception of the antenna) are installed in the aircraft, one system may be checked against the other in the following manner in lieu of the check procedure specified above: Both systems shall be tuned to the same VOR ground facility and the indicated bearings to that station noted. The maximum permissible variation between the two indicated bearings is 4°.

(c) The person making the VOR operational check as specified in subdivisions (a) or (b) of this section shall make an entry of such check in the aircraft log or other permanent record showing the date, place, bearing error, and his signature.

21474. No person shall pilot a civil aircraft within the United States unless he has in his personal possession at all times while piloting aircraft a valid pilot certificate with appropriate ratings issued by the administrator, or an appropriate and valid foreign pilot certificate and ratings. Such certificate shall be presented for examination to any inspector of the administration or state or local law enforcement officer upon the request of such inspector or enforcement officer.

21475. No person shall pilot an aircraft under authority of a pilot certificate issued by the administrator, unless he has in his personal possession at all times while piloting aircraft a medical certificate or other evidence satisfactory to the administrator showing that he has met the physical requirements appropriate to his rating within the following time limits:

(a) Student or private pilot: 24 calendar months.

(b) Commercial pilot: 12 calendar months, or 24 calendar months for operations requiring only a private pilot rating.

(c) Airline transport pilot: Six calendar months, or 12 calendar months for operations requiring only a commercial pilot rating, or 24 calendar months for operations requiring only a private pilot rating.

21476. A person shall not pilot any aircraft during a period of any known physical deficiency or increase in physical deficiency which would render him unable to meet the physical requirements prescribed by federal statutes or regulations governing aeronautics for the issuance of his currently effective medical certificate.

21477. A record of the flight time used to substantiate recent experience or qualification for certificates or ratings shall be kept in a bound logbook. The logging of other flight time is not required. Such record shall show:

(a) Date of flight, duration of flight, and the points between which such flight was made,

(b) Category and type of the aircraft flown, the airplane class and engine horsepower,

(c) Aircraft identification mark,

(d) Dual instruction endorsed by a rated instructor, solo, pilot in command, instrument, and night flying time.

21478. (a) A student pilot may log as solo only that time during which he is the sole occupant of the aircraft in flight.

(b) A private or commercial pilot may log flight time as pilot in command that flight time during which he is the sole manipulator of the controls of an aircraft for which he is rated or that flight time during which he is the sole occupant of the aircraft. A flight instructor may log flight time as pilot in command that flight time during which he is serving as a flight instructor. All flight time so logged may be credited toward the total flight time required for a higher pilot rating.

(c) A private or commercial pilot may log as copilot time that flight time during which he is performing the duties of a copilot. Such pilot shall be entitled to credit not more than 50 percent of such flight time toward the total flight time required for a higher grade of pilot rating, but in no event shall a private pilot be entitled to credit more than 50 hours of such flight time.

(d) Instrument flight time may be logged as such by the pilot actually manipulating the controls only when the aircraft is flown solely by reference to instruments either under actual or simulated instrument flight conditions.

21479. No person shall pilot an aircraft or serve as a member of the crew while under the influence of intoxicating liquor or use any drug which affects his faculties in any manner contrary to safety. A pilot shall not permit any

person to be carried in the aircraft who is obviously under the influence of intoxicating liquor or drugs, except a medical patient under proper care or in case of emergency.

21479.3. No person shall operate an aircraft in the air, or on the ground or water, in a careless or reckless manner so as to endanger the life or property of others. In any proceeding charging careless or reckless operation or aircraft in violation of this section, the court in determining whether the operation was careless or reckless shall consider the standards for safe operation of aircraft prescribed by this part and by federal statutes or regulations governing aeronautics.

21479.5. For any violation of Section 21479 or 21479.3, in addition to, or in lieu of, the penalties provided by Section 21019, or as a condition to the suspension of a sentence, the court may prohibit the violator from operating an aircraft within the State for a period not exceeding one year. Violation of the prohibition of the court may be treated as a separate offense under this section or as a contempt of court. Upon a plea of guilty or conviction under Section 21479 or 21479.3, the commission shall cause a record of the plea or conviction and of the sentence imposed to be maintained. This section shall not be construed as warrant for the court or any other agency or person to take away, impound, hold, or mark any federal certificate, permit, rating, or license.

21480. No pilot shall tow anything by aircraft unless authority for such operation has been issued by the administrator.

21481. No person piloting an aircraft shall permit any object to be dropped from such aircraft in flight which creates a hazard to persons or property.

21482. No person piloting an aircraft shall permit a parachute jump to be made from such aircraft over congested areas of cities, towns, or settlements, or an open air assembly of persons except in an emergency or except under the terms of an authorization issued by the administrator.

21483. No pilot shall intentionally fly an aircraft in aerobatic flight carrying passengers unless all occupants are equipped with approved parachutes.

21484. No pilot shall carry on an aircraft a parachute which is available for emergency use unless:

(a) It is a Civil Aeronautics Administration approved chair-type (canopy in back) parachute which has been packed by a qualified parachute rigger within the preceding 120 days; or

(b) It is a Civil Aeronautics Administration approved-type, other than a chair-type (canopy in back) parachute which has been packed by a qualified parachute rigger within the preceding 60 days.

21485. No person piloting an aircraft shall permit explosives or other dangerous articles such as inflammable liquids or solids, oxidizing material, corrosive liquid, inflammable or noninflammable compressed gas, poison gas or liquid, poisonous liquid or solid, or tear gas to be carried in aircraft, except as provided for by federal statutes or regulations governing aeronautics. Small arms ammunition for personal use, necessary aircraft signaling devices, and equipment necessary to safe operation of the aircraft are permitted.

21486. Aircraft operated under instrument flight rules conditions shall carry sufficient fuel, considering weather reports and forecasts of wind and other weather conditions, to complete the flight to the point of first intended landing, to fly from there to the alternate airport, and to fly thereafter for 45 minutes at normal cruising speed.

21487. No student pilot shall pilot an aircraft carrying a passenger, or for compensation or hire, or in furtherance of a business.

21488. A student pilot shall not operate an aircraft in solo flight until:

(a) He has passed a written examination pursuant to federal statutes and regulations governing aeronautics.

(b) He has been found competent by a flight instructor to make such flight and authority therefor has been endorsed by such instructor on the student pilot certificate, and

(c) He has been given instruction in the prevention of and recovery from power-on and power-off stalls entered from all normally anticipated flight attitudes.

21489. A student pilot shall not pilot an aircraft outside a local flying area designated by his flight instructor until:

(a) He has had a total of 15 hours of flight time, or, if enrolled in and receiving flight instruction from an approved air agency, he is deemed competent by such agency, and

(b) He has received at least three hours of dual cross country instruction from a flight instructor, and his student pilot certificate has been appropriately endorsed by such instructor.

21490. A student shall not pilot an aircraft other than that of the category, class, and type which has been endorsed on his student pilot certificate by a flight instructor.

21491. A student who has not piloted a powered aircraft within 90 days shall not pilot such aircraft in solo flight until he has passed a flight check given by a flight instructor and that fact has been endorsed by such instructor in the student pilot logbook.

21492. A private pilot shall not pilot aircraft for compensation or hire; except that he may pilot aircraft in connection with any business or employment, if the flight is merely incidental thereto and does not involve the carriage of persons or property for compensation or hire, and an aircraft salesman holding a private pilot rating may demonstrate aircraft in flight to a prospective purchaser if he has at least 200 hours of flight time credited in accordance with federal statutes and regulations governing aeronautics.

21493. A commercial pilot may pilot aircraft for hire. A commercial glider pilot may give flight instruction in gliders.

21494. An airline transport pilot may exercise the privileges of a commercial pilot with an instrument rating.

21495. A private or commercial pilot shall not serve as pilot in command of an aircraft carrying passengers or operated for remuneration other than in aircraft of the category and class for which he is rated. A private or commercial pilot shall not serve as pilot in command of aircraft exceeding 12,500 pounds maximum certificated weight when carrying passengers or operated for remuneration unless, in addition to proper category and class ratings, he also holds an appropriate type rating. A private or commercial pilot may serve as pilot in command of aircraft for which he is not rated when it is being flown without passengers and is not being operated for remuneration, unless other limitations placed on his certificate prohibit him from doing so.

21496. This section governs flight instructions:

(a) Aircraft shall be equipped with fully functioning dual controls.

(b) A flight instructor shall not give more than 8 hours of dual flight instruction in any one day and not more than 36 hours of dual flight instruction in any seven-day period.

(c) A flight instructor shall endorse the certificate of any student pilot for solo flight or flight in different categories, classes, and types of aircraft only if he has determined that the student is competent to exercise such privileges with safety, and for cross-country flight only if he has additionally determined that the student has an elementary knowledge of aeronautical charts, meteorological data, and the use of a magnetic compass.

(d) A flight instructor shall not give flight instruction in a category of aircraft in which he has not demonstrated to an authorized representative of the administrator his proficiency as a flight instructor.

21497. A pilot shall not pilot aircraft under instrument flight rules, unless he holds a valid instrument rating issued by the administrator.

21498. Instrument flight instruction may be given only by a person holding an effective instrument rating issued pursuant to federal statutes and regulations governing aeronautics. A flight instructor rating is not required.

21499. Aircraft shall not be flown under simulated instrument flight conditions unless:

(a) Fully functioning dual controls are installed in the aircraft.

(b) An appropriately rated pilot occupies the other control seat as safety pilot, and

(c) Such safety pilot at all times has adequate vision forward and to either side of the aircraft, or a competent observer occupies a position in the aircraft so that his field of vision adequately supplements that of the safety pilot.

21500. No person shall pilot an aircraft carrying passengers unless within the preceding 90 days he has made at least five take-offs and landings to a full stop in aircraft of the same category, class, and type of aircraft to be flown. No person shall pilot a glider carrying passengers in aero-tow flight unless within the preceding 12 months he has made at least six aero-tow flights aggregating one hour during which the foregoing take-off and landing requirements are met.

21501. No person shall pilot an aircraft carrying passengers during the period from one hour after sunset to one hour before sunrise, unless he has made at least five take-offs and landings to a full stop during such period within the preceding 90 days.

21502. A flight instructor shall not exercise the privileges of the instructor rating unless within the preceding 12 calendar months he has either:

(a) Given at least 10 hours of flight instruction while appropriately rated, or

(b) Demonstrated his continued proficiency to the administrator pursuant to federal statutes or regulations governing aeronautics.

21503. A pilot shall not pilot an aircraft under instrument flight rules unless he has had at least six hours of instrument flight under actual or simulated flight conditions during the preceding six calendar months or until he has had six hours of such flight time under:

(a) Actual instrument conditions, accompanied by a pilot of at least private rating holding an appropriate aircraft and instrument rating, or

(b) Simulated instrument conditions in an aircraft accompanied by a pilot of at least private rating holding an appropriate aircraft rating, or

(c) Simulated instrument conditions in equipment approved by the administrator pursuant to federal statutes or regulations governing aeronautics, except that at least three hours must have been had in accordance with subdivision (a) or (b) of this section.

SEC. 5. Article 3 (commencing at Section 21526) is added to Chapter 3, Part 1, Division 9 of said code, to read:

21539. "Control zone" means an airspace of defined dimensions, as designated by the Administrator, extending upwards from the surface, to include one or more airports, and within which rules additional to those governing flight in control areas apply for the protection of air traffic.

21540. "Cruising altitude" means a constant altimeter indication, in relation to sea level, maintained during a flight or portion thereof.

21541. "Expected approach time" means the time at which it is expected that an arriving aircraft will be cleared to commence approach for a landing.

21543. "Flight visibility" means the average horizontal distance that prominent objects may be seen from the cockpit.

21544. "Glider" means an aircraft without mechanical means of propulsion, the support of which in flight is derived dynamically from the reaction on surfaces in motion relative to the air.

21545. "Ground visibility" means the average range of vision in the vicinity of an airport as reported by the United State Weather Bureau or, if unavailable, by an accredited observer.

21546. "Helicopter" means a type of rotorcraft the support of which in the air is normally derived from airfoils mechanically rotated about an approximately vertical axis.

21547. "IFR" is the symbol used to designate instrument flight rules.

21548. "IFR conditions" means weather conditions below the minimum prescribed for flights under VFR.

21549. "Magnetic course" means the true course or track, corrected for magnetic variation, between two points on the surface of the earth.

21550. 21555. "Traffic pattern" means the flow of aircraft operating on and in the vicinity of an airport during specified wind conditions as established by appropriate authority.

21557. "VFR conditions" means weather conditions equal to or above the minimum prescribed for flights under VFR.

21558. The air traffic rules in this article apply to aircraft operated anywhere in this State, except:

(a) Military aircraft of the United States armed forces, and

(b) Aircraft engaged in special flight operations, which are conducted in accordance with the terms and conditions of a certificate of waiver issued by the administrator.

21559. The pilot in command of the aircraft is directly responsible for its operation and has final authority as to operation of the aircraft. In emergency situations which require immediate decision and action the pilot may deviate from the rules prescribed in this article to the extent required by consideration of safety. When such emergency authority is exercised, the pilot, upon request of the administrator, shall file a written report of such deviation. In an emergency situation which results in no deviation from the rules prescribed in this article but which requires air traffic control to give priority to an aircraft, the pilot of such aircraft shall make a report within 48 hours of such emergency situation to the nearest regional office of the administrator.

21560. Aircraft shall be operated at all times in compliance with the general flight rules prescribed by this article and also in compliance with either the visual flight rules or the instrument flight rules, whichever are applicable.

21561. Before beginning a flight, the pilot in command of the aircraft shall familiarize himself with all available information appropriate to the intended operation. Preflight action for flights away from the vicinity of an airport, and for all IFR flights, shall include a careful study of available current weather reports and forecasts, taking into consideration fuel requirements, an alternate course of action if the flight cannot be completed as planned, and also any known traffic delays of which he has been advised by air traffic control.

21562. (a) No person shall operate an aircraft within a prohibited area unless prior permission has been obtained from appropriate authority.

(b) No person shall operate an aircraft within a restricted area contrary to the restrictions imposed unless prior permission has been obtained from appropriate authority.

21563. An aircraft in distress has the right of way over all other air traffic.

21564. Aircraft converging shall give way to other aircraft of a different category in the following order: airplanes and rotorcraft shall give way to airships, gliders, and balloons; airships shall give way to gliders and balloons; gliders shall give way to balloons. When two or more aircraft of the same category are converging at approximately the same altitude, each aircraft shall give way to the other which is on its right. In any event, mechanically driven aircraft shall give way to aircraft which are seen to be towing other aircraft.

21565. When two aircraft are approaching head-on, or approximately so, each shall alter its course to the right.

21566. An aircraft that is being overtaken has the right of way, and the overtaking aircraft, whether climbing, descending, or in horizontal flight, shall keep out of the way of the other aircraft by altering its course to the right, and no subsequent change in the relative positions of the two aircraft shall absolve the overtaking aircraft from this obligation until it is entirely past and clear.

21567. Aircraft, while on final approach to land, or while landing, have the right of way over other aircraft in flight or operating on the surface. When two or more aircraft are approaching an airport for the purpose of landing, the aircraft at the lower altitude has the right of way, but it shall not take advantage of this rule to cut in front of another which is on final approach to land, or to overtake that aircraft.

21568. An aircraft which is obliged by the rules prescribed in Sections 21563 to 21567, inclusive, to keep out of the way of another shall avoid passing over or under the other, or crossing ahead of it, unless passing well clear.

21569. No person shall operate an aircraft in such proximity to other aircraft as to create a collision hazard. No person shall operate an aircraft in formation flight when passengers are carried for hire. No aircraft shall be operated in formation flight except by prearrangement between the pilots in command of such aircraft.

21570. No person shall engage in aerobatic flight:

- (a) Over congested areas of cities, towns, settlements, or over an open-air assembly of persons, or
- (b) Within any civil airway or control zone, or
- (c) When the flight visibility is less than 3 miles, or
- (d) Below an altitude of 1,500 feet above the surface.

21571. Except when necessary for take-off or landing, no person shall operate an aircraft below the following altitudes:

(a) Anywhere at an altitude which will permit, in the event of the failure of a power unit, an emergency landing without undue hazard to persons or property on the surface.

(b) Over the congested areas of cities, towns or settlements, or over an open-air assembly of persons, an altitude of 1,000 feet above the highest obstacle within a horizontal radius of 2,000 feet from the aircraft. Helicopters may be flown at less than the minimum prescribed herein if such operations are conducted without hazard to persons or property on the surface and in accordance with subdivision (a) of this section, but shall comply with any requirements imposed by the administrator.

(c) Over other than congested areas, at an altitude of 500 feet above the surface, except over open water or sparsely populated areas. In such event, the aircraft shall not be operated closer than 500 feet to any person, vessel, vehicle, or structure. Helicopters may be flown at less than the minimums prescribed herein if such operations are conducted without hazard to persons or property on the surface and in accordance with subdivision (a).

(d) The minimum IFR altitude established by the administrator for that portion of the route over which the operation is conducted. Where the administrator has not established such a minimum, operations shall be conducted at not less than 1,000 feet above the highest obstacle within a horizontal distance of five miles from the center of the course intended to be flown.

21572. Aircraft shall be operated on and in the vicinity of an airport in accordance with the following rules:

(a) When approaching for landing, all turns shall be made to the left unless the airport displays standard visual markings approved by the administrator and which indicate that all turns are to be made to the right, or unless otherwise authorized by air traffic control.

(b) If air traffic control is in operation at the airport, contact shall be maintained with such control, either visually or by radio, to receive any air traffic control instructions which may be issued.

(c) Aircraft operating from an airport shall conform to the traffic patterns prescribed for that airport by the administrator.

21573. No person shall operate an aircraft contrary to air traffic control instructions in areas where air traffic control is exercised.

21574. If a flight plan has been filed, the pilot in command of the aircraft, upon landing or completion of the flight, shall file an arrival or completion notice with the nearest Civil Aeronautics Administration communications station or control tower.

21575. When an air traffic clearance has been obtained under either the VFR or IFR rules, the pilot in command of the aircraft shall not deviate from the provisions thereof unless an amended clearance is obtained. In case emergency authority is used to deviate from the provision of an air traffic clearance, the pilot in command shall notify air traffic control as soon as possible and, if necessary, obtain an amended clearance. However, nothing in this section shall prevent a pilot, operating on an IFR traffic clearance, from notifying air traffic control that he is canceling his IFR flight plan and proceeding under VFR if he is operating in VFR weather conditions when he takes such action.

21576. Between sunset and sunrise:

(a) All aircraft in flight or operated on the ground or under way on the water shall display position lights.

(b) All aircraft parked or moved within or in dangerous proximity to that portion of any airport used for, or available to, night flight operations shall be clearly illuminated or lighted, unless the aircraft are parked or moved in an area marked with obstruction lights.

(c) All aircraft at anchor shall display anchor lights, unless in an area within which lights are not required for vessels at anchor.

21577. Aircraft shall comply with the following requirements as to ceiling and distance from clouds:

(a) Within control zones. Unless authorized by air traffic control, aircraft shall not be flown:

(1) Less than 500 feet vertically under, 1,000 feet vertically over, and 2,000 feet horizontally from any cloud formation; or

(2) Beneath the ceiling when it is less than 1,000 feet.

(b) Elsewhere. (1) When at an altitude of more than 700 feet above the surface, aircraft shall not be flown less than 500 feet vertically under, 1,000 feet vertically over, and 2,000 feet horizontally from any cloud formation;

(2) When at an altitude of 700 feet above the surface or less, aircraft shall not be flown unless clear of clouds.

21578. (a) When the ground visibility is less than three miles, no person shall take off or land an aircraft at an airport within a control zone, or enter the traffic pattern of such an airport, unless an air traffic clearance is obtained from air traffic control.

(b) When the flight visibility is less than three miles, no person shall operate an aircraft in flight within a control zone, unless an air traffic clearance is obtained from air traffic control.

(c) When the flight visibility is less than three miles, no person shall operate an aircraft within a control area.

(d) When outside of control zones and control areas, no person shall operate an aircraft in flight when the flight visibility is less than one mile. However, helicopters may be flown at or below 700 feet above the surface when the flight visibility is less than one mile if operated at a reduced speed which will give the pilot of such helicopter adequate opportunity to see other air traffic or any obstruction in time to avoid hazard of collision.

21579. When an aircraft is operated in level cruising flight at 3,000 feet or more above the surface, the following cruising altitudes shall be observed:

(a) Within control zones and control areas, at an odd or even thousand-foot altitude appropriate to the direction of flight as specified by the administrator.

(b) Elsewhere, when the flight visibility is less than three miles, at an altitude appropriate to the magnetic course being flown as follows:

(1) 0° to 89° inclusive, at odd thousands.

(2) 90° to 179° inclusive, at odd thousands plus 500.

(3) 180° to 269° inclusive, at even thousands.

(4) 270° to 359° inclusive, at even thousands plus 500.

21580. If a VFR flight plan is filed, it shall contain such of the information listed in Section 21582 as air traffic control may require.

21581. When aircraft are not flown in accordance with the distance-from-cloud and visibility rules prescribed in the visual flight rules, Sections 21577 to 21580, inclusive, aircraft shall be flown in accordance with the rules prescribed in Sections 21582 to 21589, inclusive.

21582. Prior to takeoff from a point within a control zone or prior to entering a control area or control zone, a flight plan shall be filed with air traffic control. Such flight plan shall contain the following information unless otherwise authorized by air traffic control:

(a) Aircraft identification, and if necessary, radio call sign.

(b) Type of aircraft; or, in the case of a formation flight, the types and number of aircraft involved.

(c) Full name, address, and number of pilot certificate of pilot in command of the aircraft, or of the flight commander if a formation flight is involved.

(d) Point of departure.

(e) Cruising altitude, or altitudes, and the route to be followed.

(f) Point of first intended landing.

(g) Proposed true air speed at cruising altitude.

(h) Radio transmitting and receiving frequencies to be used.

(i) Proposed time of departure.

(j) Estimated elapsed time until arrival over the point of first intended landing.

(k) Alternate airport or airports, in accordance with the requirements of Section 21583.

(l) Amount of fuel on board expressed in hours.

(m) Any other information which the pilot in command of the aircraft, or air traffic control, deems necessary for air traffic control purposes.

(n) For international flights, the number of persons on board.

21583. An airport shall not be listed in the flight plan as an alternate airport unless current weather reports and forecasts show a trend indicating that the ceiling and visibility at such airport will be at or above the following minimums at the time of arrival, except as modified by the administrator:

(a) Airport served by radio directional facility: Ceiling 1,000 feet, visibility one mile; or ceiling 900 feet, visibility 1½ miles; or ceiling 800 feet, visibility two miles;

(b) Airport not served by radio directional facility: Ceiling 1,000 feet with broken clouds or better, visibility two miles.

21584. Prior to take-off from a point within a control zone, or prior to entering a control area or control zone, an air traffic clearance shall be obtained from air traffic control.

21585. Aircraft shall be flown at the following cruising altitudes:

(a) Within control areas and control zones, at altitudes authorized by air traffic control;

(b) Elsewhere, at an altitude appropriate to the magnetic course being flown as follows:

(1) 0° to 89° inclusive, at odd thousands.

(2) 90° to 179° inclusive, at odd thousands plus 500.

(3) 180° to 269° inclusive, at even thousands.

(4) 270° to 359° inclusive, at even thousand plus 500.

21586. Aircraft operating along civil airways shall be flown as follows unless otherwise authorized by Air Traffic Control:

(a) Along a low/medium frequency airway, aircraft shall be flown to the right of the center line of such airway.

(b) Along a VOR airway, aircraft shall be flown on a radial designated as forming the center line of such airway.

21587. When instrument let down to an airport is necessary, a standard instrument approach procedure prescribed for that airport by the administrator shall be used, unless:

(a) A different instrument approach procedure specifically authorized by the administrator is used, or

(b) A different instrument approach procedure is authorized by air traffic control for the particular approach, provided such authorization is issued in accordance with procedures approved by the administrator.

21588. Within control zones and control areas the pilot in command of the aircraft shall ensure that a continuous watch is maintained on the appropriate radio frequencies and shall report by radio as soon as possible the time and altitude of passing each designated reporting point, or the reporting points specified by air traffic control, together with weather conditions which have not been forecast, and other information pertinent to the safety of flight.

21589. If unable to maintain two-way radio communications, the pilot in command of the aircraft shall:

(a) If operating under VFR conditions, proceed under VFR and land as soon as practicable, or

(b) Proceed according to the latest air traffic clearance to the radio facility serving the airport of intended landing, maintaining the minimum safe altitude or the last acknowledged assigned altitude whichever is higher. Descent shall start at the expected approach time last authorized or, if not received and acknowledged, at the estimated time of arrival indicated by the elapsed time specified in the flight plan."

Senator Montgomery moved that Senate Bill No. 1946 be amended and re-referred to Committee on Agriculture.

Motion carried.

SECOND READING OF SENATE BILLS (OUT OF ORDER)

Senate Bill No. 1946—An act to amend Section 4231 of, and to add Section 4291 to, the Agricultural Code, relating to the marketing of fluid milk and cream.

Bill read second time.

Motion to Amend

Senator Montgomery moved the adoption of the following amendment:

Amendment No. 1

On page 1, of the printed bill strike out lines 24 to 28, inclusive, and insert "milk fat or fluid skim milk components when such charges are necessary to move such milk or its components to the area where sold. In determining the maximum transportation charges so established, the director shall limit such charges to the rate established for a direct haul from producers dairy location to the plant in the area where sold, on all milk picked up by tankers in amounts of 200 gallons or more, unless such milk is diverted to a manufacturing plant under the provisions of a stabilization and marketing plan, and is thereafter not used for Class 1 purposes.

It is the intent of the Legislature to recognize that country plants are plants at which milk is received in production areas, and reshipped to another marketing area or areas for ultimate sale, and as such are essential to the maintenance of an adequate supply of fluid milk and its perishable by-products for consumers. In determining maximum country plant handling charges, the director shall determine the functions of each country plant to which a producer ships fluid milk. For those functions which involve receiving fluid milk from a producer in cans, or from farm tanks in amounts less than 200 gallons per delivery, recooling, re-assembling, and reshipping such fluid milk or its components to a terminal market for sale in Class 1 usages, a maximum charge shall be established for each function performed, the total of which charges may be assessed against said producer for that milk which is ultimately sold as Class 1 usage. For those functions which involve receipt, storage, diversion, or handling of fluid milk or its components, so as to provide for an adequate supply to take care of normal fluctuations in consumer demand, as defined in Section 4281, a maximum charge shall be established for each function performed, the total of which charges may be assessed against all Class 1 usage for the plant in the area where such milk is ultimately sold, and may be thereafter allocated to each producer furnishing Class 1 usage for said plant, whether by direct shipment or through a country plant as defined in this section.

No provision of this section shall be construed to eliminate the requirement for the director to include in the Class 1 price an allowance for furnishing the additional supply of milk for consumer needs specified in Section 4281 as an integral part of the necessary supply for said consumers."

PROCEEDINGS UNDER CALL OF THE SENATE
COMMUNICATIONS

The following communication was received and read, and ordered printed in the Journal:

SENATE, CALIFORNIA LEGISLATURE, May 14, 1957

Lieutenant Governor Harold J. Powers

President of the Senate

Senate Chamber, State Capitol, Sacramento, California

DEAR PRESIDENT POWERS: Herewith are communications and tabulations relative to the interest rate currently being paid by the State of California in the sale of general obligation bonds.

The consequences of the rapid rise of the interest rate on the sale of state bonds for the schools, for veterans and for the state projects for hospitals and water development are so critical that I think this information should be available to the Members of the Legislature and the public.

Respectfully,

NELSON S. DILWORTH, Chairman
Senate Investigating Committee on
Education

STATE OF CALIFORNIA, DEPARTMENT OF FINANCE

SACRAMENTO, April 18, 1957

Hon. Nelson S. Dilworth, Member of the Senate
State Capitol, Sacramento 14, California

DEAR SENATOR DILWORTH: Your letter of April 2d inquired as to the interest penalty which might be suffered by the State in marketing a substantial amount of general obligation bonds.

In the informed opinion of investment bankers, we are paying between 0.10 percent and 0.25 percent more in interest than if we had a more modest program for issuance of general obligation bonds. In their opinion if a larger bond program were authorized it would increase the interest rate by possibly as much as one-half of 1 percent. This depends, of course, upon the rate of sale of such bonds.

For the past several years between \$100 million and \$150 million state general obligation bonds have been sold. In January 1957, \$85 million bonds were sold and another \$80 million are scheduled for sale on April 24th. It is anticipated approximately \$150 million additional will be sold during the remainder of 1957. This would make a total for the year of \$315 million.

At some point beyond this level of issuance of bonds, the credit of the State would be injured but so far the only penalty is in higher interest costs.

Sincerely yours,

JOHN M. PEIRCE, Director of Finance

STATE OF CALIFORNIA, DEPARTMENT OF FINANCE

SACRAMENTO, May 6, 1957

Hon. Nelson S. Dilworth, Member of the Senate
State Capitol, Sacramento 14, California

DEAR SENATOR DILWORTH: It will be agreeable for you to release to the Legislature my letter of April 18th relative to interest costs paid by the State on the sale of its general obligation bonds.

You might wish to use the additional statistical material which is attached. This information supplements my April 18th letter as you have been advised would be done.

The table headed State and Municipal Financing shows an increasing trend in the past three years in the issuance of both State of California and all California public agency bonds relative to the national total. The percentage will increase materially in 1957 due to both a larger amount of State of California bonds to be marketed as well as political subdivisions within the State, even though the national total might rise. In other words, it is anticipated California financing will increase at a more rapid rate than nationwide.

The other two attached schedules verify the relatively higher interest cost currently being paid on the sale of general obligation bonds of the State. These schedules compare the net interest cost with representative indexes and show California bonds adversely to these indexes. This deterioration was minor at the sale on January 16th and increased materially at the April 24th sale. Just how much further the deterioration will go depends to a degree upon the total amount of general obligation bonds which the Legislature might propose to be approved by the people at the next election.

Very truly yours,

JOHN M. PEIRCE, Director of Finance

Most Gracious God, the bestower of every good gift, we bow our heads in reverence before Thee this day. And since Thou requirest of every man a reasonable service, quicken us, we beseech Thee, with a sense of Thy gracious presence—of Thy guiding providence that never slumbers—of Thy eternal love that never fails, so that uniting ourselves with Thee, we may in all our aspirations and thoughts do those things which please Thee and thus live in Thy favor. We look to Thee, O Lord, to lift up our minds, to clear our vision so that all our desires may become submissive to reason—our reason to faith and the whole man to Thee. O heavenly Father, make of us workmen that need never be ashamed. Make us ever grateful for our existence in a land where Thy name is revered; make us aware of the blessings of democracy founded upon the principles of liberty and justice. May the cause for which we toil this day commend itself as righteous and honorable in Thy sight. AMEN.

PRAYER

The following prayer was offered by the Chaplain, Rev. Father Luke Powleson:

O God, in whom all things live, move and have their being—bestow upon us this day—a true and righteous conscience in the affairs of State that are before us. Bless us, we beseech Thee, as we labor—and remind us continually of our obligations to Thee and our fellow-man. Without Thee, we can do nothing. In Thee, we have our being, our strength and our consolation. Grant unto all, therefore, the light of Thy help so that the great problems of our State which must be solved may be for the best interests of all concerned. Our burden, O Lord, is heavy. We need great wisdom, prudence—which only Thou canst give. In Thy hands, and no other, can we find that knowledge so necessary for the progress of our national and civic life. Renew then in all that desire to follow more faithfully in Thy footsteps. Renew especially in each one that spirit of sacrifice of self for the good of others; for it is in Thy spirit alone that we can really find peace and enjoy a contented conscience by adhering to the requirements of Thy wishes. AMEN.

SECOND READING OF SENATE BILLS (OUT OF ORDER)

Senate Constitutional Amendment No. 1—A resolution to propose to the people of the State of California an amendment to the Constitution of the State, by adding to Article XIV thereof new sections to be numbered 5, 6, 7, 8, 9, and 10, relating to water, and the development, conservation, and use thereof.

Resolution read.

Motion to Amend

Senator Regan moved the adoption of the following amendments:

Amendment No. 1

On page 1, between lines 9 and 10, of the printed measure, insert

"SEC. 5. It is hereby declared that because of conditions prevailing in this State it is necessary for the State to assume a continuing responsibility for assuring the timely and economical development of the water resources of the State. In discharging this responsibility the State shall coordinate its activities with those of private enterprise, public agencies, and the Federal Government and may cooperate with them to that end.

Second, that Section 6 be added to Article XIV thereof, to read:

SEC. 6. (a) Each area of the State wherein water not subject to existing rights originates in quantities exceeding the reasonable ultimate requirements of such area and constituting a practicable source of water for use in other portions of the State shall be deemed for the purposes of Sections 5 to 10, inclusive, of this Article XIV to be a "surplus water area." The board shall issue no permits for the exportation of water from any area of the State unless such area shall have been determined to be a "surplus water area."

(b) Prior to authorization of the construction or acquisition of any facility by the State, a purpose of which is the exportation of water from a surplus water area, or before any assignment or relinquishment by the State to an assignee for such purpose shall become effective, and before issuing any permit for the appropriation of water to be exported from a "surplus water area," the board shall determine the boundaries of each surplus water area affected thereby and shall reserve for use within each such surplus water area, from the water originating therein and not subject to existing rights, the quantities of water reasonably required for ultimate beneficial use therein. In determining the boundaries of any such surplus water area, the board shall include all land within the watershed of the stream or stream system affected by or involved in such determinations and all land adjacent to such watershed which feasibly can be served with water therefrom.

(c) All such determinations and reservations shall be made after investigation and consideration of relevant factors, including the long-range planning of the State for the development, conservation, and utilization of the water resources of such areas, and after giving reasonable notice and opportunity to be heard in conformity with such procedure as the Legislature may prescribe.

(d) All such determinations and reservations provided for in this section shall be subject to judicial review de novo which review may be initiated in the superior court of any county within or partially within the surplus water area and said court shall have jurisdiction of such actions, and any appeals from the findings and decisions of the board shall be filed within 90 days after the filing of the board's findings and decision.

(e) Each reservation so made for any surplus water area shall be binding upon all persons.

(f) The board on its own motion or on petition of any interested person, must forthwith re-examine and revise, either by increasing or decreasing, any reservation made pursuant hereto at any time it appears that it is no longer reasonable.

(g) Whenever the amount of water available under the reservation made for a surplus water area has become inadequate to meet the reasonable requirements for beneficial use of water in such area, then and thereupon the amount of water reserved for the surplus water area shall be forthwith increased by the amount of such deficiency and water subject to export from the surplus water area shall be reduced by the same amount. To the extent that the amount of water committed by contract for export from the surplus water area is so reduced, the State shall guarantee the prompt replenishment of such contract commitment. To meet this guarantee the water required by the area to which the water was theretofore committed by contract shall have first priority with respect to water available for export from any surplus water area by means of any state constructed facility or project from which it can be delivered by practical and feasible methods, either by substitution in the surplus water area for the additional water to be furnished to it or by direct delivery to the area whose water supply has been so reduced as aforesaid. Any additional expense involved in such replenishment of the water supply in excess of that which would be involved if there were no such substitution shall be borne by

the area to which such water was originally committed for export. The Legislature shall take such further action as may be necessary to fulfill this guarantee.

Third, that Section 7 be added to Article XIV thereof, to read:

SEC. 7. (a) The Water Development Fund is created as a special fund in the State Treasury, the moneys, securities and increment of which shall be expended solely as provided in this section.

(b) There shall be deposited in the Water Development Fund:

(1) All revenues received by the State from the extraction of oil and gas from tide and submerged lands and state public lands in excess of ten million dollars (\$10,000,000) in each fiscal year, over and above the cost of administration of all such lands and any refunds authorized by law;

(2) Four million dollars (\$4,000,000) each month from the first revenues received in the General Fund after setting apart the moneys required to be applied by the State to the support of the Public School System and State University;

(3) All money in the Revenue Deficiency Reserve Fund;

(4) All money in the Investment Fund;

(5) All revenues over and above the cost of operation, maintenance, and the amounts required for the payment of principal and interest on any bonds issued to secure funds for the construction of the project producing the revenues, received by the State from the sale or furnishing of water, water power, and electric energy from any State water development project, or in the case of a joint project, the portion of such revenues to which the State is entitled;

(6) The proceeds of the sale of any state bonds issued to provide funds for water resource development; provided, however, that if the bonds are authorized for the purpose of providing funds for the cost of designated facilities, the proceeds of the sale thereof, when deposited in the Water Development Fund, shall be used for that purpose and no other; and

(7) Any other funds made available to the Water Development Fund by appropriations, gift, grant, or any other means;

(8) Provided, however, that at any regular session the Legislature, by a vote of three-fourths of the members elected to each house, may reduce the amount of the revenues specified in subparagraphs (1) and (2) of this paragraph (b) to be deposited in the Water Development Fund during the next succeeding 12 months.

(c) Any money in the Water Development Fund may be appropriated by majority vote of the members elected to each house of the Legislature for: (1) construction or acquisition by the State, either alone or in conjunction with any person, of facilities authorized by the Legislature, or for the service of any indebtedness incurred in such construction or acquisition which is authorized by law; or (2) loans, on such terms, which may include the waiver of any interest charges, as may be prescribed by the Legislature to public agencies for the construction of facilities.

No appropriation from the fund shall be made for the construction or acquisition of any facility which is in substantial conflict with any general or coordinated plan approved by the Legislature for the development, conservation and utilization of the water resources of the State. The initial appropriation for any facility to be constructed or acquired by the State shall not be made until the department has certified to the Legislature that in its judgment the capital costs of the project of which such facility is a part will be repaid from the revenues from the project within such period of time as the Legislature may prescribe, except to the extent that the Legislature determines such costs to be nonreimbursable expenditures benefiting the State. In determining whether revenues from the project will be sufficient to repay the cost of any facility and in establishing rates for services from the project, revenues from other project services may be utilized to assist in defraying that portion of the cost of works which is allocable to irrigation and which the department finds is in excess of the payment ability of irrigation water users.

(d) Eighty percent (80%) of all money deposited in the Water Development Fund shall be used solely for the construction or acquisition of major inter-regional water transfer projects, and twenty percent (20%) shall be used solely for the construction or acquisition of projects of primarily local benefit and effect. By a three-fourths vote of the members elected to each house, the Legislature at any regular session may revise such percentages with respect to the money to be deposited in the Water Development Fund during the next succeeding 12 months.

(e) Subject to all the provisions of this Section 7, priority in the appropriation and expenditures of moneys in the Water Development Fund shall be given first, to the construction of facilities and projects necessary to make up deficiencies resulting from the reduction of export allotments because of the applications of the provisions of Sections 6(f) and 6(g) hereof.

(f) Whenever the Legislature authorizes the construction or acquisition by the State of any water storage reservoir that will develop water for use outside the watershed in which it originates and in which such water storage reservoir is located, the Legislature shall also authorize such additional upstream water storage reservoirs and other facilities, except distribution systems, as may then be determined by the Legislature to have engineering feasibility and to be necessary and practical to satisfy the reasonable ultimate requirements of the area dependent

upon such upstream developments and shall provide for the financing and construction by the State of each such upstream reservoir and other facility when it is needed.

Fourth, that Section 8 be added to Article XIV thereof, to read:

SEC. 8. (a) Subject to all existing water rights and to reservations made pursuant to Section 6 and to all other provisions hereof, the Legislature shall authorize the department to execute on behalf of the State, contracts for the sale or delivery of water to be made available by facilities or projects authorized for construction or acquisition by the State. No right to water or to the use of water so contracted to be sold or delivered by the State adverse to the right of the person contracting therefor shall be acquired by any other person.

(b) Each such contract shall provide: (1) for the substitution of water in equal quantity and of substantially equal quality from an alternate source or sources of supply without increase in the contract price, (2) for periodic adjustment of the contract price to reflect any changes in costs of operation and maintenance, and (3) that the right to require delivery of water under such contract shall be limited to such water as shall be reasonably required for the beneficial use to be served, and (4) that such contract, to the extent that it involves the exportation of water from a surplus water area, shall be subject to the reservation made pursuant to subsection 6(b), and to any revision thereof made pursuant to subsection 6(f) hereof, and any reduction resulting under subsection 6(g) hereof.

(c) The Legislature may also authorize the execution on behalf of the State of contracts for the sale or delivery of electric energy made available by any such facility or project.

(d) The provisions of Article I, Section 16 of this Constitution prohibiting the impairment of the obligation of contracts shall apply to all contracts made by the State pursuant to this Section 8, including contracts with public agencies. Any act of the Legislature dissolving any public agency which has so contracted with the State shall provide for continuity of adequate service in the distribution to ultimate consumers and users of the water so contracted for within the contract limitations herein contained.

(e) The State may sue and be sued by any party to a contract made pursuant to this Section 8 in any court of competent jurisdiction on any cause of action arising out of such contract.

Fifth, That Section 9 be added to Article XIV thereof, to read:

SEC. 9. (a) No money shall be expended from the Water Development Fund for the construction or acquisition of any facility authorized prior to the effective date of this section for the purpose of exporting water from any surplus water area wherein it originates for use elsewhere in the State without first complying with the provisions of Section 6 of this article. This prohibition shall not be construed to affect the expenditure, with respect to such facility, of funds for the construction of units or portions or stages thereof, having flood control, power production, or local water supply as their primary purpose.

(b) Nothing in Sections (5) to (10) inclusive of this Article XIV nor any legislative, administrative or other action pursuant hereto shall in any manner affect or impair any existing water right, including riparian, appropriative, prescriptive, overlying landowners or other existing or vested right to water nor operate to reduce the quantity of water necessary to supply or service any such water right, whether now or hereafter determined, nor shall such provisions or actions pursuant thereto alter the legal effect of any application theretofore filed to appropriate water or of any action theretofore taken which, when taken, was in any way material to the creation of a water right or to the establishment of the nature or extent thereof except that any application so filed by the State shall be subject to the provisions of Section 6 of this article. No findings, decisions, determinations, reservations or allocations made by any agency hereunder shall in any manner be binding upon or determinative of any of such vested water rights or in the quantitative scope or extent thereof.

(d) No water may be exported from any watershed or drainage area by means of a project constructed or acquired by the State or with funds made available in whole or in part by the State through loan or grant, unless such water is first offered for use in areas within the same watershed or drainage area which feasibly can be served by such project. For the purposes of this subsection the drainage areas of the Sacramento and San Joaquin Valleys shall be considered as one and the same watershed or drainage area.

(e) Any action at law or in equity affecting, directly or indirectly, water rights, priorities or reservations, in favor of a surplus water area shall be commenced and tried, and if commenced elsewhere, shall be transferred to, a county in which such area, or a substantial part thereof, is located.

(f) The provisions of Sections 10505, 11128, 11460 and 11463 of the Water Code, and the prior rights thereby recognized, shall remain in full force and effect. It is hereby declared that the purpose of this article is to implement and carry out, rather than impair or detract from, the intent of those provisions and the provisions of this article shall be liberally construed to that end.

(g) In connection with all water allocations to be made pursuant hereto and in the granting of permits and licenses for the appropriation of water preference shall be given to applications of a higher use over applications for a lower use in accordance with the following order of uses:

2963. A plea or verdict of guilty or a conviction following a plea of nolo contendere made to a charge of a felony or of any offense involving moral turpitude is deemed to be a conviction within the meaning of this article. At the direction of the committee, the board shall order the certificate suspended or revoked, or shall decline to issue a certificate, when the time for appeal has elapsed, or the judgment of conviction has been affirmed on appeal or when an order granting probation is made suspending the imposition of sentence, irrespective of a subsequent order under the provisions of Section 1203.4 of the Penal Code allowing such person to withdraw his plea of guilty and to enter a plea of not guilty, or setting aside the verdict of guilty, or dismissing the accusation, information or indictment.

Proceedings under this section shall be governed by Chapter 3 (commencing with Section 525) of Title 7, Part 2 of the Code of Civil Procedure, except that no undertaking shall be required in any action commenced by the board. 2981. The failure to pay the annual registration fee shall automatically effect a revocation of the certificate after a period of 60 days from the first day of January of each year.

The certificate shall not be restored except upon written application and the payment of the annual registration fee and the delinquency fee required by this chapter. No examination shall be required for the restoration of a certificate that has been revoked under the provisions of this section.

2982. Amendment No. 1

In the title of the printed bill, as amended in Senate May 13, 1957, strike out lines 4 to 11, inclusive, and insert "add Sections 1815, 1816, 1817, 1818, 1819, 1920, 1821, 1822, 1823, 1824, and 1825 to the Revenue and Taxation Code, relating to the equalization of property for tax purposes, declaring".

Amendment No. 2

On page 1, strike out lines 3 to 8, inclusive, strike out all of pages 2, 3, and 4, and insert

"Section 1. Section 1815 is added to the Revenue and Taxation Code, to read:

1815. To enable the board to perform its duties under this article and Sections 9 and 14 of Article XIII of the State Constitution, the board shall make a survey, not less often than triennially, in each county to determine the total full cash value of all locally assessable tangible property as of the lien date for the last equalized roll. As a basis for this determination, the board shall ascertain the full cash value of a sample of locally assessable tangible property sufficient in size and dispersion to insure an adequate representation therein of the several classes of property throughout the county. In ascertaining the full cash value of the property in the sample the board shall consider appraisal data compiled by competent appraisers. The board shall make surveys each year in no fewer than 18 and no more than 22 counties.

Sec. 2. Section 1816 is added to said code, to read:

1816. As soon as appraisals have been made in any county by the board pursuant to Section 1815, the board shall give the assessor of the county a reasonable opportunity to examine and discuss the appraisals with the board appraisers.

Sec. 3. Section 1817 is added to said code, to read:

1817. After completing a survey pursuant to Section 1815, the board shall estimate any change that may have occurred in the full cash value of locally assessable tangible property between the lien date of the roll for which the survey was made and the lien date of the current roll. The board shall use as the basis for such estimate data on population, school enrollment, retail sales or other factors reasonably indicative of change or lack of change in the total full cash value of the property. The relationship between the total assessed value of the tangible property on the current local roll and the total full cash value of locally assessable tangible property so estimated shall be computed for each county of the State by July 15th of each year. The board shall transmit promptly to each county assessor a statement of its determination relating to his county.

In making any determinations under this section in the years 1957, 1958 and 1959, the board shall use for any county the latest comparable survey previously made by it for the county in lieu of a survey made pursuant to Section 1815.

SEC. 4. Section 1818 is added to said code, to read:

1818. The board shall each year prepare tabulations showing for each county the ratio of assessed to full cash value of tangible property subject to local assessment. The tabulations shall show the ratio of assessed to full cash value of individual parcels of such tangible property in the sample of any survey in the county made pursuant to Section 1815, as well as the calculations by which the ratio of assessed to market value of tangible property for the county is determined from the ratios applicable to individual properties within the county. The tabulations shall also show the data used, pursuant to Section 1817, to estimate the total full cash value of the tangible property on the current local roll from the total full cash value of the tangible property on the local roll of a prior year, as well as the statistical methods used to arrive at the determination.

SEC. 5. Section 1819 is added to said code, to read:

1819. As soon as tabulations have been made pursuant to Section 1818, the board shall give the assessor of each county a reasonable opportunity to examine and discuss with the board that portion of the tabulations affecting property in his county.

SEC. 6. Section 1820 is added to said code, to read:

1820. No appraisal data relating to individual properties obtained for the purposes of any survey under this chapter, nor any tabulations made pursuant to this chapter, shall be made public, and no state or local officer gaining knowledge thereof in any action taken under this chapter shall make any disclosure with respect thereto except as that may be required for the purposes of this chapter. Nothing herein shall prohibit disclosure of appraisal data by the assessor to the assessee of the property to which the data relate.

SEC. 7. Section 1821 is added to said code, to read:

1821. The board shall meet at the State Capitol during July and August of each year for the performance of its duties under this article and Sections 1, 9, and 14 of Article XIII of the State Constitution. While so in session, under rules of notice prescribed by the board, it shall equalize the assessment of property as prescribed by law. If the number of such matters to be heard, or the amount of time required to hear them, prevents the board from concluding this session by August 10th, the board may continue its equalization proceedings to and including August 20th, and may defer its final action on the equalization of assessments accordingly, but it shall not hear any matter as to which timely application or notice has not been made or given during July.

SEC. 8. Section 1822 is added to said code, to read:

1822. Equalization by the board of the valuation of taxable property in counties for the purposes of taxation shall be by raising or lowering the value of tangible property entered upon the secured roll by the assessor of the county.

SEC. 9. Section 1823 is added to said code, to read:

1823. If any county, city and county, or municipal corporation desires to secure a review, equalization, or adjustment of the assessment of its property by the board in pursuance of Section 1 of Article XIII of the State Constitution, it shall apply to the board therefor in writing before July 20th. The application shall show the facts claimed to require action of the board and a copy thereof shall be filed with the assessor whose assessment is questioned.

SEC. 10. Section 1824 is added to said code, to read:

1824. The final action of the board in equalizing an assessment or a local roll shall be performed only at the State Capitol. When the equalization is completed, the secretary of the board shall transmit to each county auditor and board of supervisors and each city council involved a statement of:

(a) The changes made by the board in the local roll.

(b) The per centum to be added to or deducted from the valuation of the roll. This statement is prima facie evidence of the regularity of all proceedings of the board resulting in the action which is the subject matter of the statement.

SEC. 11. Section 1825 is added to said code, to read:

1825. As soon as the auditor receives from the board the statement of its equalization, he shall enter the corresponding changes in a column provided with

a proper heading on the roll, counting any fractional sum when more than five dollars (\$5) as ten dollars (\$10), and omitting it when five dollars (\$5) or less, so that no separate valuation contains a fraction of ten dollars (\$10), and he shall add the column to show the total value of the property in the county as corrected by the board."

Amendment No. 3

On page 5, strike out lines 1 to 16, inclusive, and insert "Sec. 12. The Revenue and Taxation Code sections added by Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 and 11 of this act shall be considered a part of Article 1, Chapter 2, Part 3 of Division 1 of that code, and shall remain operative until such date as Chapter 1466 of the Statutes of 1949 becomes fully operative, on which date they are hereby repealed."

Amendments read, and adopted.

Bill ordered printed, and re-referred to Committee on Revenue and Taxation.

Relative to saving the 1957 cherry crop in California

WHEREAS, The Legislature has been informed that the abnormal and excessive late spring rains have seriously endangered the 1957 cherry crop in California; and

WHEREAS, Ripening cherries are irreparably damaged by moisture being allowed to stand on them for more than a short period of time; and

WHEREAS, The cherry crop represents a multimillion dollar industry in this State and its destruction would bring hardship to thousands of persons whose livelihood is associated with producing, harvesting, processing, packing, and distributing the fruit; and

Resolved by the Senate of the State of California, That the members strongly urge all private owners of helicopters to assist in saving the 1957 cherry crop from being destroyed by moisture, by flying their helicopters over the cherry orchards in their neighboring areas; and be it further

Resolved, That units of the United States Army, Navy, Air Corps, Marine Corps, Coast Guard, and National Guard located in this State are requested to make all helicopters immediately available for use in the urgent project of protecting the cherry crop at this crucial stage of its development.
